Fensham; Richard F. Gunstone; Richard T. White all of Monash University, Australia., 2012-11-12 A group of science educators with experience of being involved in curriculum development and in conducting extensive research on many aspects of teaching and learning science have combined their findings in this volume Each author has conducted research into his or her own area of science education and presents the implications of this research for a specific area of science teaching The experiences of members of the Monash Children s Science Group specifically three primary teachers and one biology teacher have also been included so as to present the voices of teachers for whom writing a personal account of their teaching is often an unappealing task Emerging Technologies for the Classroom Chrystalla Mouza, Nancy Lavigne, 2012-11-07 This book provides contemporary examples of the ways in which educators can use digital technologies to create effective learning environments that support improved learning and instruction These examples are guided by multiple conceptual and methodological traditions evolving from the learning sciences and instructional technology communities as well as other communities doing important work on learning technologies In particular the book provides examples of technology innovations and the ways in which educators can use them to foster deep understanding collaboration creativity invention and reflection Additional examples demonstrate the ways in which emerging mobile and networked technologies can help extend student learning beyond the confines of the classroom wall and support student directed learning and new media literacies **Journal of American Indian Education** , 2012 *The World Bank and Education* Steven J. Klees, Joel Samoff, Nelly P. Stromquist, 2012-09-07 World Bank and Education Book Blurb For more than three decades the World Bank has been proposing global policies for education Presented as research based validated by experience and broadly applicable these policies are ideologically driven insensitive to local contexts and treat education as independent of international dynamics and national and local economies and cultures Target countries needing resources

and unable to generate comparable research find it difficult to challenge World Bank recommendations The World Bank and Education Critiques and Alternatives represents a powerful challenge to World Bank proposals Probing core issues equity quality finance privatization teaching and learning gender and human rights highlights the disabilities of neoliberal globalization The authors demonstrate the ideological nature of the evidence marshaled by the World Bank and the accompanying policy advice Addressing key education issues in developing countries the authors analyses provide tools for resisting and rejecting generic policy prescriptions as well as alternative directions to consider Robert Arno in his preface says whether the Bank is responsive to the critiques and alternatives brilliantly offered by the present authors the book is certain to influence development and education scholars policymakers and practitioners around the globe
