Grade Increment (Supplementary) Examination

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate full mark.

Time: 1 hr.

Full Marks: 75

SET: V

Grp: "A" Group: "A"

Answer all the questions

1. Define company.  
Ans:  
A company is an artificial person created by law. The capital of a company is collected by issuing shares to the people known as shareholders. The management of a company is done by the board of directors which is elected by the shareholders. **NEB** may ask several questions on the above with full reference to the set as needed. **NEB** expects this answer because it is a basic concept of the company.

2. What is issued capital?  
Ans:  
The amount of nominal value held by the shareholders is called the issued share capital. It represents the part value of the shares which are distributed to the shareholders. Issued share capital and share premium share the shares received by the shareholders in the form of shares which are paid for at the full value (not that some shares are paid for at a discount, but that some shares are paid for at a premium).

3. What is income statement?  
Ans:  
An income statement is one of the company's financial statements and shows the company's revenues and expenses during a particular period. It indicates how income is generated from the business or not profit for the business. **NEB** may ask several questions on the above with full reference to the set as needed. **NEB** expects this answer because it is a basic concept of the company.

4. State any two objectives of cost account.  
Ans:  
a. To analyze cost and loss, and to find the reason for it.  
b. To measure the cost of the product.

5. What is indirect materials cost?

Balamurugan, 2022-03-18 THE NEW ADVANCED SOCIETY Included in this book are the fundamentals of Society 5.0 artificial intelligence and the industrial Internet of Things featuring their working principles and application in different sectors A 360 degree view of the different dimensions of the digital revolution is presented in this book including the various industries transforming industrial manufacturing the security and challenges ahead and the far reaching implications for society and the economy The main objective of this edited book is to cover the impact that the new advanced society has on several platforms such as smart manufacturing systems where artificial intelligence can be integrated with existing systems to make them smart new business models and strategies where anything and everything is possible through the internet and cloud smart food chain systems where food products can be delivered to any corner of the world at any time and in any situation smart transport systems in which robots and self driven cars are taking the lead advances in security systems to assure people of their privacy and safety and smart healthcare systems where biochips can be incorporated into the human body to predict deadly diseases at early stages Finally it can be understood that the social reformation of Society 5.0 will lead to a society where every person leads an active and healthy life Audience The targeted

audience for this book includes research scholars and industry engineers in artificial intelligence and information technology engineering students cybersecurity experts government research agencies and policymakers business leaders and entrepreneurs Sandeep Kumar Panda PhD is an associate professor in the Department of Data Science and Artificial Intelligence at IcfaiTech Faculty of Science and Technology ICFAI Foundation for Higher Education Hyderabad His research areas include artificial intelligence IoT blockchain technology cloud computing cryptography computational intelligence and software engineering Ramesh Kumar Mohapatra PhD is an assistant professor in the Department of Computer Science and Engineering National Institute of Technology Rourkela Odisha India His research interests include optical character recognition document image analysis video processing secure computing and machine learning Subhrakanta Panda PhD is an assistant professor in the Department of Computer Science and Information Systems BITS PILANI Hyderabad Campus Jawahar Nagar Hyderabad India His research interests include social network analysis cloud computing security testing and blockchain S Balamurugan PhD is the Director of Research and Development Intelligent Research Consultancy Services iRCS Coimbatore Tamilnadu India He is also Director of the Albert Einstein Engineering and Research Labs AEER Labs as well as Vice Chairman Renewable Energy Society of India RESI India He has published 45 books 200 international journals conferences and 35 patents

Metal Forming Processes Kakandikar Ganesh Marotrao, Anupam Agrawal, D. Ravi Kumar, 2022-08-25 Metal forming processes include bulk forming and sheet metal forming with numerous applications This book covers some of the latest developments aspects of these processes such as numerical simulations to achieve optimum combinations and to get insight into process capability Implementation of new technologies to improve performance based on Computer Numerical Control CNC technologies are also discussed including the use of CAD CAM CAE techniques to enhance precision in manufacturing Applications of AI ML the Internet of Things IoT and the role of tribological aspects in green engineering are included to suit Industry 4.0 Features Covers latest developments in various sheet metal forming processes Discusses improvements in numerical simulation with various material models Proposes improvements by optimum combination of process parameters Includes finite element simulation of processes and formability Presents a review on techniques to produce ultra fine grained materials This book is aimed at graduate students engineers and researchers in sheet metal forming materials processing and their applications finite element analysis manufacturing and production engineering

Climate Change and Cotton Production in Modern Farming Systems Michael P Bange, JT Baker, PJ Bauer, KJ Broughton, GA Constable, Q Luo, DM Oosterhuis, Y Osanai, P Payton, DT Tissue, KR Reddy, BK Singh, 2016-03-02 Throughout the world cotton is broadly adapted to growing in temperate sub tropical and tropical environments but growth may be challenged by future climate change Production may be directly affected by changes in crop photosynthesis and water use due to rising CO<sub>2</sub> and changes in regional temperature patterns Indirect effects may result from a range of government regulations aimed at climate change mitigation While there is certainty that future climate change will impact cotton

production systems there will be opportunities to adapt This review begins to provide details for the formation of robust frameworks to evaluate the impact of projected climatic changes highlight the risks and opportunities with adaptation and details the approaches for investment in research Ultimately it is a multi faceted systems based approach that combines all elements of the cropping system that will provide the best insurance to harness the change that is occurring and best allow cotton industries worldwide to adapt Given that there will be no single solution for all of the challenges raised by climate change and variability the best adaptation strategy for industry will be to develop more resilient systems Early implementation of adaptation strategies particularly in regard to enhancing resilience has the potential to significantly reduce the negative impacts of climate change now and in the future
