Guided Reading Environmental Activism:

Environment, Politics and Activism Somnath Batabyal, 2015-07-17 This book examines the role of the media in environmental politics and activism in the 21st century. It highlights how politics is mediated in myriad ways through newspapers and news channels through mobile telephony and through social networking sites. Further, it shows how the media creates and influences relevant discourses, builds campaigns and awareness, and adopts and discards issues. With a range of perspectives on issues of environmental justice and equity, the volume scrutinizes how the media discourse on environment shapes our politics and the role of international politics, finance, youth, newspapers, magazines, and 24-hour television. Bringing together academics, activists, and media persons, this highly topical book will serve as significant reading for researchers and scholars of development studies and media studies as well as policymakers, NGOs, and environmental campaigners.

Leisure, Activism, and the Animation of the Urban Environment I R Lamond, Brett Lashua, Chelsea Reid, 2022-12-26 This book brings together chapters that address questions of leisure, activism, and the animation of urban environments. The authors share research that explores the meaning and making of activist practices, events of dissent, and the arts in everyday life. Situated in a growing body of activist scholarship and social justice research within the field of leisure studies, the contributions spotlight understandings and disruptions of public spaces in cities. These range from overtly political practices such as protest marches to recreational practices such as skateboarding and bicycling that remake cities through their contestations of space. Across the collection, the chapters raise broader questions of civil society: whether it is research on youth activism, historical uses of public spaces by rightwing or racist groups, or interrogating the absence of leisure and closure of public spaces for people experiencing homelessness. Some chapters explore events such as festivals as sites of resistance and social change. In others, grassroots neighbourhood activism through arts is centralised, or mega events are framed through protest campaigns against bids to host the Summer Olympic Games. A central thread running through the chapters is the question of whose voices count and whose remain unheard in events of dissent in the city. The chapters in this book were originally published as a special issue of *Leisure Studies*.

Building STEM Skills Through Environmental Education Schroth, Stephen T., Daniels, Janese, 2020-09-18 Environmental studies provide an ideal opportunity for children of any age to build critical and creative thinking skills while also building skills in science, technology, engineering, and mathematics (STEM). Exploring issues related to sustainability and environmental concerns permits learners to identify problems, develop research questions, gather and analyze data, develop possible solutions, and disseminate this information to others. Despite the advantages of green education and its ability to improve student achievement, there is a gap in understanding the interplay between curriculum and instruction and how this affects teaching and learning. *Building STEM Skills Through Environmental Education* is an essential publication that addresses gaps in the understanding of green education and offers educators meaningful and comprehensive examples of environmental and sustainability education in the

Pre K through secondary grade levels The book offers a unique combination of foundational understanding of green education and chapters that illustrate the principles and impact of green education across grade levels content areas assessment systems instructional strategies technology and other related topics It is ideally designed for educators curriculum developers instructional designers advocates policymakers researchers academicians and students **The Oxford Handbook of Self-determination Theory** Richard M.
