Christian B k s insertion of a poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule Jen Bervin s considerations of silk fibers and their use in biomedicine Gertrude Stein s examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character and Lisa Robertson s studies of nineteenth century meteorology and the soft architecture of clouds In their attempt to understand physical processes unfolding within lively material worlds Smailbegovi contends these poets have developed a distinctive materialist poetics Structured as a poetic cosmology akin to Lucretius s On the Nature of Things which begins at the atomic level and expands out to the vastness of the universe Poetics of Liveliness provides an innovative and surprising vision of the relationship between science and poetry **The Illustrated London News** ,1887 **Magill's Encyclopedia of Science :**
