Much has been written about leaders and leadership. Journal articles, blogs, and books try to home in on the essence of an effective leader. While there is common agreement that a executive's performance can make or break a company, defining that essence of effective leadership remains the Holy Grail for those who find themselves at the top, for those who are responsible for carrying out the strategies and dictates of their managers, and for the shareholders who want to see commitment, action, and positive financial return. *Breaking the Leadership Mold* is designed to help senior executives and managers respond to the challenges of today and shed the vestiges of days gone by. In so doing, they will better lead and enable their staff and create a work environment that is healthy, engaging, productive, and sustainable. Based on the author's extensive research and 35 years experience in working with local, national, and international companies, *Breaking the Leadership Mold* offers 20 principles, such as Principle 10: Recognize How Executive Team Dynamics Promote Mediocrity and Principle 14: Get Other Executives On Board or Out of the Way, that when implemented will ensure that not only is there effective communication throughout the organization from top to bottom and bottom to top, but also that employees and executives alike contribute to their full potential. The net result: the organization wins on every measure. The 20 principles are built on the pillars of case studies, experience, and research. Effective leadership is an absolute in any business environment, but becomes even more critical in times when businesses face unprecedented challenges and need to be nimble and responsive to change. *Breaking the Mold* has proven strategies to empower, unite, and galvanize managers and employees and their organization to enable them to prosper and adapt in a swift changing environment. **Bulletin of the Atomic Scientists**, 1966-09
