

The HUB 09S is a further development of the popular HUB 09S, but it does everything better. Both cranes look very similar, but that's where the similarities cease.

The HUB 09S features a new, low-headroom boom system with a separate extension cylinder on each extension. We have done away with all jacking on the outer boom and extensions, and reduced the fixed full 4 hook assemblies to just one - on the inner extension. All this leads to easier handling in confined areas, and new larger slide-pads considerably reduce friction and give smoother boom action.

The HUB 09S's working geometry has been optimised, resulting in better lifting capacity - in the upper lifting range, capacity has been boosted by over 20%. What's more, the 09S has an amazing close-in lifting height.

The HUB 09S is a droop-front general cargo crane in the 10-ton-capacity class that offers excellent manoeuvrability. Choose between cross-controls, HUB's well-known two-valve version with the main controller, too, or the more advanced combination with HUB valve in and top-view or Control-Platform.

The design solutions include bending the oil for the hydraulic cylinders through the wheel centres, which eliminates all external loading or jacking on the outer boom.
