Note: Refer to your user's guide for information about clearing your device.

For localized language versions of this document, go to www.honeywell.com.

Getting Started

Turn off the computer's power before connecting the base. Then power up the computer once the base is fully recharged. When the base is connected and powered on, put the scanner in the base to establish a link. The green LED on the base flashes to indicate the scanner's battery is charging.

Power Supply Assembly (if included)

Note: The power supply must be ordered separately, if needed.

USB Connection

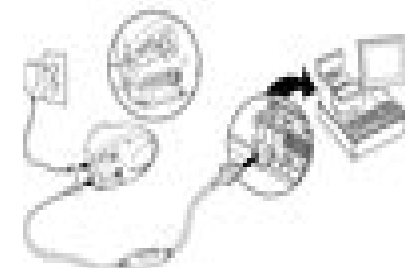

Keyboard Wedge Connection

RS232 Serial Port Connection

RS485 Connection

Reading Techniques

The new reader projects an infrared beam that should be centered over the bar code, but it can be positioned in any direction for a good read.

Hold the scanner over the bar code, pull the trigger, and center the infrared beam on the bar code.

The infrared beam is wider when the scanner is closer to the code and larger when it is further from the code. Hold the scanner close to smaller bar codes, and further away from larger bar codes to get a proper read.

If the bar code is highly reflective (e.g., laminated), you may need to tilt the scanner at an angle so the bar code can be scanned.

Note: If the scanner beeps after scanning a bar code, the link has not been established. If the scanner beeps twice, the link has been established.

Standard Product Defaults

The following bar code reads all standard product default settings.

Standard Product Defaults

Note: PDF and 2D bar codes can only be read by Voyager model 1452g2 and cannot be read by model 1452g1.

RS485 Interface

The RS485 interface defaults to port 10. If you have an IBM PC/XT terminal using port 10, scan the appropriate code below to program the terminal. Then power cycle the read register.

IBM PC AT (485) Port 10 Interface

IBM PC AT (485) Port 11 Interface

Note: For additional RS485 interface selections, see the User's Guide for your product at our website www.honeywell.com.

USB Serial

Scan the following code to program the scanner to emulate a regular RS232C-based COM Port. If you are using a Microsoft Windows PC, you will need to download a driver from the Honeywell website (www.honeywell.com). The driver will use the read register (User Port number). Apple Macintosh computers recognize the scanner as a USB CDC class device and automatically use a read driver.

USB Serial

Note: No extra configuration (e.g., baud rate) is necessary.

USB PC Keyboard

Scan the following code to program the scanner for a USB PC Keyboard.

USB PC Keyboard

Keyboard Country

Scan the Program Keyboard Country bar code below. Then scan the numeric bar codes from page 5. Scan the same bar code to program the keyboard for your country. As a general rule, the following characters are not supported by the scanner for countries other than the United States:

0 1 2 3 4 5 6 7 8 9

Program Keyboard Country

Country Code	Scan	Country Code	Scan
Belgium	1	Italy	5
Denmark	2	Norway	6
France	3	Spain	10
Germany	4	Switzerland	4
Great Britain	7	USA (Default)	0

Scan

Note: For a complete list of country codes, see the User's Guide for your product at our website, www.honeywell.com.

Locked Link

If you link a scanner to a base using the Locked Link Mode, other scanners are blocked from being linked if they are inadvertently placed into the base. If you do place a different scanner into the base, it will change the scanner, but the scanner will not be linked.

Locked Link Mode (Single Scanner)

To use a different scanner, you need to unlink the original scanner by scanning the Unlink Scanner bar code.

Override Locked Scanner

If you need to replace a broken or lost scanner that is linked to a base, scan the Override Locked Scanner bar code with a new scanner, and place that scanner in the base. The scanner link will be overridden; the broken or lost scanner's link with the base will be removed, and the new scanner will be linked.

Override Locked Scanner

Unlinking the Scanner

If the base has a scanner linked to it, that scanner must be unlinked before a new scanner can be linked. Once the previous scanner is unlinked, it will no longer communicate with the base. Scan the Unlink Scanner bar code to unlink a scanner.

Unlink Scanner

Honeywell Scanner User39s Guide

SA Adler

Honeywell Scanner User39s Guide:

Eventually, you will definitely discover a further experience and carrying out by spending more cash. yet when? get you agree to that you require to acquire those all needs in imitation of having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will guide you to comprehend even more concerning the globe, experience, some places, behind history, amusement, and a lot more?

It is your definitely own mature to play reviewing habit. in the course of guides you could enjoy now is **Honeywell Scanner User39s Guide** below.
