The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram,Maki Kubota,Sergio Miguel Pereira Soares,2024-03-27 Over the past three decades studies investigating heritage speaker HS linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language s HS outcomes display variation across a wide spectrum of differences as compared to each other other types of bilinguals as well as their monolingual peers Studies have traditionally used mostly behavioral

methodologies rooted in adjacent established fields e.g. L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance, important insights for linguistic theory and challenges related to home minority language maintenance, contact policy and more. A birds eye view makes it clear that the methodologies one uses to tap into HSs linguistic knowledge areas if not more are important than the phenomena under investigation especially in light of how their unique experiences with their heritage and other languages are present across a continuum.

Big Questions in Ecology and Evolution Thomas N. Sherratt, David M. Wilkinson, 2009-02-19 Why do we age? Why cooperate? Why do so many species engage in sex? Why do the tropics have so many species? When did humans start to affect world climate? This book provides an introduction to a range of fundamental questions that have taxed evolutionary biologists and ecologists for decades. Some of the phenomena discussed are on first reflection simply puzzling to understand from an evolutionary perspective whilst others have direct implications for the future of the planet. All of the questions posed have at least a partial solution, all have seen exciting breakthroughs in recent years yet many of the explanations continue to be hotly debated. Big Questions in Ecology and Evolution is a curiosity driven book written in an accessible way so as to appeal to a broad audience. It is very deliberately not a formal text book but something designed to transmit the excitement and breadth of the field by discussing a number of major questions in ecology and evolution and how they have been answered. This is a book aimed at informing and inspiring anybody with an interest in ecology and evolution. It reveals to the reader the immense scope of the field, its fundamental importance and the exciting breakthroughs that have been made in recent years.

Formal approaches to complexity in heritage language grammars Maria Polinsky, Michael T. Putnam, 2024-07-05 This collective volume breaks new ground in studies of linguistic complexity by addressing this phenomenon in heritage languages. It dismisses with the conception that heritage languages are less complex than their baseline or homeland counterparts and shows complexity trade offs at various levels of linguistic representation. The authors consider defining properties of complexity as a phenomenon, diagnostics of complexity and the ways complexity is modeled, measured or operationalized in language sciences. The chapters showcase several bilingual dyads and offer new empirical data on heritage language production and use.

web nov 16 2022 is the series $\sum_{n=0}^{\infty} \frac{1}{n!} p^n$ or a geometric series $\sum_{n=0}^{\infty} r^n$ limits $\sum_{n=1}^{\infty} \frac{1}{n!} p^n$ or $\sum_{n=1}^{\infty} r^n$ if so use the fact that p series will only converge if $p < 1$ and a geometric series will only converge if $|r| < 1$
