Ferrell,Debbie M. Thorne,Linda Ferrell,2023-01-15 Formerly published by Chicago Business Press now published by Sage Business Society integrates business and society into organizational strategies to showcase social responsibility as an actionable and practical field of interest grounded in sound theory In corporate America today social responsibility has been linked to financial performance and is a major consideration in strategic planning This innovative Eighth Edition ensures that business students understand and appreciate concerns about philanthropy employee well being corporate governance consumer protection social issues and sustainability helping to prepare them for the social responsibility challenges and opportunities they will face throughout their careers The author team provides the latest examples stimulating cases and unique learning tools that capture the reality and complexity of social responsibility Students and instructors prefer this book due to its wide range of featured examples tools and practices needed to develop and implement a socially responsible approach to business *Chinese Television and Soft Power in Africa* Angela Lewis,2023-08-18 This book examines the phenomenal growth over recent years of StarTimes a Chinese pay TV company with around 30 million subscribers providing satellite television to 20 African countries The broadcaster whose markets include demographic groups deemed uneconomic by Western television providers combines entertainment such as Chinese drama and Kung Fu content dubbed into African languages with Chinese state programming thus making the station at least partially a public diplomacy instrument At the same time the channel provides new indigenous language channels widened access to television in rural areas and sponsors African soccer brands The book considers all aspects of StarTimes how it fits into China s development assistance programmes its structure as a private company nonetheless financed by Chinese banks and based on extensive interview research in Ghana Kenya and Zambia how the station is perceived by media professionals Overall the book shows how this major Chinese international media expansion both contributes very significantly to African development in a way which is sensitive to local concerns and at the same time enhances China s international image **Non-market Economies in the Global Trading System** James J. Nedumpara,Wei huan Zhou,2018-09-20 This book provides one of the most comprehensive and compelling analysis of Non Market Economies NMEs and their treatment under the current world trading system In particular it examines the treatment of China as an NME in anti dumping investigations especially post December 2016

Central to this analysis is Section 15 of China's Protocol of Accession to the WTO which is the focal point of the controversy between China and other major WTO Members. The book highlights multiple perspectives on the interpretation of Section 15 and the Second Ad Note to Article VI of the General Agreement on Tariffs and Trade (GATT) which form the legal basis for China's special treatment in anti-dumping proceedings and provides unique approaches on interpreting the above treaty texts. In addition, the book explores recourses to trade remedy instruments other than anti-dumping to identify and address state-driven market distortions in the case of NMEs. Authored by leading practitioners and scholars, the chapters offer a detailed commentary and rich insights into the diverse approaches and methods used by anti-dumping investigation agencies of leading users. This book serves as an all-inclusive resource for discerning all facets of this issue, magnitude of the consequences and potential threats to the delicate trading system. It is of particular relevance to economies in transition and newly acceding countries to the WTO. This book generates special interest among legal practitioners, exporters, trading firms, think tanks, academicians, policy makers and the entire community engaged in international trade disputes with China.

**Mechanisms to Enable Follow-On Innovation** Alina Wernick, 2021-05-13. The patent system is based on one patent per product presumption and therefore fails to sustain complex follow-on innovations that contain a number of patents. The book explains that follow-on innovations may be subject to market failures such as hold-ups and excessive royalties. For decades, scholars have debated whether the market problems can be solved with voluntary licensing (i.e. open innovation) or with compulsory liability rules. The book concludes that neither approach is sufficient. On the one hand, incentives to engage in open innovation practices involving patents are insufficient. On the other hand, the existing compulsory liability rules in patent and competition law are not tailored to address follow-on innovators' interests. To transcend this problem, the author proposes a compulsory liability rule against the suppression of follow-on innovation that paradoxically fosters early-on voluntary licensing between patent holders and follow-on innovators. The book is aimed at patent and competition law scholars and practitioners, patent attorneys, managers, engineers, and economists who either engage in open innovation involving patents or conduct research on the topic. It also offers insights to policy and law makers reviewing the possibilities to foster open innovation initiatives or adapt the scope of patent remedies or employ compulsory licenses for patents. **Advanced**

**Multimedia and Ubiquitous Engineering** James J. Park, Laurence T. Yang, Young-Sik Jeong, Fei Hao, 2019-08-21. This book presents the combined proceedings of the 13th International Conference on Multimedia and Ubiquitous Engineering (MUE 2019) and the 14th International Conference on Future Information Technology (Future Tech 2019) both held in Xi'an, China, April 24-26, 2019. The aim of these two meetings was to promote discussion and interaction among academics, researchers, and professionals in the field of ubiquitous computing technologies. These proceedings reflect the state of the art in the development of computational methods involving theory, algorithms, numerical simulation, error and uncertainty analysis, and novel applications of new processing techniques in engineering science and other disciplines related to ubiquitous computing.

The Wires of War Jacob Helberg, 2022-11-15 From the former news policy lead at Google an urgent and groundbreaking account of the high stakes global cyberwar brewing between Western democracies and the autocracies of China and Russia that could potentially crush democracy From 2016 to 2020 Jacob Helberg led Google's global internal product policy efforts to combat disinformation and foreign interference During this time he found himself in the midst of what can only be described as a quickly escalating two front technology cold war between democracy and autocracy On the front end we're fighting to control the software applications news information social media platforms and more of what we see on the screens of our computers tablets and phones a clash which started out primarily with Russia but now increasingly includes China and Iran Even more ominously we're also engaged in a hidden back end battle largely with China to control the Internet's hardware which includes devices like cellular phones satellites fiber optic cables and 5G networks This tech fueled war will shape the world's balance of power for the coming century as autocracies exploit twenty first century methods to re divide the world into twentieth century style spheres of influence Helberg cautions that the spoils of this fight are power over every meaningful aspect of our lives including our economy our infrastructure our national security and ultimately our national sovereignty Without a firm partnership with the government Silicon Valley is unable to protect democracy from the autocrats looking to sabotage it from Beijing to Moscow and Tehran The stakes of the ongoing cyberwar are no less than our nation's capacity to chart its own future the freedom of our democratic allies and even the ability of each of us to control our own fates Helberg says And time is quickly running out Publisher's website AI, Pandemic and Healthcare Nuoya

Chen, 2024-02-13 The demand for telehealth solutions has been growing exponentially after the Covid 19 pandemic Hospitals remain understaffed which leads to staff burnouts and unsatisfactory patient experience They also find it difficult to use AI to reduce the workload for doctors and nurses Doctors barely use data collected from wearables and home use medical devices to make diagnosis As generative AI advances traditional medical device manufacturers are exploring with open innovation to transform into a software based business model facing competition from large tech companies and startups This book shares the perspectives from different stakeholders around the challenges of the use of AI in healthcare **Multimedia**
