Activity 1 – Basic Skin Structure

A. Name four protective functions of the skin.

1. Protects deeper tissue: It insulates and cushions the deeper body organs and protects the entire body from mechanical damage (bumps and cuts), chemical damage (such as from acids and bases), thermal damage (heat and cold), ultraviolet (UV) radiation (in sunlight), and microbes. The uppermost layer of the skin is hardened, to help prevent water loss from the body surface.
2. Aids in body heat loss or heat retention : The skin's rich capillary network and sweat glands (both controlled by the nervous system) play an important role in regulating heat loss from the body surface.
3. Aids in excretion of urea and uric acid: The skin acts as a mini-excretory system; urea, salts, and water are lost when we sweat.
4. Synthesizes vitamin D: The skin is also a chemical plant; it manufactures several proteins important to immunity and synthesizes vitamin D. (Modified cholesterol molecules in the skin are converted to vitamin D by sunlight.) The skin also produces acidic secretions, called the acid mantle, that protect against bacterial invasion

B. Label the skin structures and areas indicated in the accompanying diagram of skin.

Workbook and Lab Manual for Sonography - E-Book Reva Arnez Curry, Marilyn Prince, 2021-08-19

Review important sonography learnings with Curry and Prince's Workbook for Sonography Introduction to Normal Structure and Function 5th Edition. This well constructed review tool supports and completes the main text by providing an excellent introduction to sonography while preparing users to accurately identify sonographic pathology and abnormalities. Each workbook chapter opens with review questions on material from the corresponding chapter in the main text. Review questions are followed by drawings from the text with parallel sonograms where appropriate that include leader lines to label structures but not the labels themselves. Workbook users will fill in the labels to identify structures in the drawings and sonograms reinforcing visual and auditory learning from the text. Answers can be looked up in both the workbook appendix and by comparing the workbook figures to the labeled figures in the main text. Unlabeled line drawings and images from every chapter provide reinforcement of what you should be noticing on the scan. Direct correlation with each chapter from the main text enables immediate thorough review of material. Review questions test your knowledge of the information learned in the text.

NEW Chapter on musculoskeletal sonography covers the latest use of ultrasound technology to visualize muscle tendon and ligament anatomy.

NEW Chapter devoted to pediatric sonography introduces you to the knowledge needed to work in this nascent specialty.

NEW Coverage of 5D technology familiarizes you with automated volume scanning.

NEW Updated content reflects the latest ARDMS standards and AIUM guidelines.

NEW Updated line drawings accompany new sonograms.
