### 1. The Industrial Revolution

**Learning Target:** Explain how the Industrial Revolution facilitated the growth and diffusion of industrialization.

**Industrial Revolution:** A period of rapid growth in the use of machines in manufacturing and production that began in the mid-1700s.

- Began in England with the invention of the steam engine and diffused out from the hearth
- Caused an increase in food production (as new technological advances occurred in farming) and caused more people moved to the cities
- Increased the gap wage between the poor and the wealthy
- Increases imperialism and colonialism because of need of raw materials (coal, lumber, cotton, etc)

### 2. Economic Sectors and Patterns

**Site factors:** industrial location factors related to the costs of the factors of production inside the factory/hey

- Capital - funds to establish new factories or expand existing ones. Most important site factor in certain industries (high-tech). More difficult for developing countries to gain access to capital
- Labor - most important site factor globally

**Labor-intensive industry:** wages and other compensation paid to employees constitute a high percentage of expenses

**Break-of-Bulk Point:** A location where transfer is possible from one mode of transportation to another (cargo ship to train)

**Agglomeration:** the process by which a certain region becomes known for producing a certain product. Examples of this include Los Angeles for movies, Houston for energy, or **Silicon Valley for computer technology.**

**Weber's Least Cost Theory:** Minimize three categories of costs to increase profits:

Transportation (weight and distance), Labor (cheap labor), and Agglomeration

- **Bulk Gaining** - makes something that gains volume or weight during production. To minimize transportation costs, they focus on proximity to markets.
- **Bulk Reducing** - Makes something that loses volume or weight during production. To minimize transportation costs, they focus on proximity to inputs
- **Agglomeration:** clustering of productive activities and people for mutual advantage (example: mall)

1. labor, transportation (including shipping containers), the break-of-bulk point, least cost theory, markets, and resources influence the location of manufacturing such as core, semi periphery, and periphery locations.
