Program SPP 1489 Algorithmic and Experimental Methods in Algebra Geometry and Number Theory which was established
and generously supported by the German Research Foundation DFG from 2010 to 2016 The goal of the program was to
substantially advance algorithmic and experimental methods in the aforementioned disciplines to combine the different
methods where necessary and to apply them to central questions in theory and practice Of particular concern was the further
development of freely available open source computer algebra systems and their interaction in order to create powerful new
computational tools that transcend the boundaries of the individual disciplines involved The book covers a broad range of
topics addressing the design and theoretical foundations implementation and the successful application of algebraic
algorithms in order to solve mathematical research problems It offers a valuable resource for all researchers from graduate
students through established experts who are interested in the computational aspects of algebra geometry and or number
