Judiciary Maria C. Escobar-Lemmon, Valerie J. Hoekstra, Alice J. Kang, Miki Caul Kittilson, 2022-01-13 This book examines the factors that facilitate the inclusion of women on high courts while recognizing that many courts have a long way to go before reaching gender parity Why did women start appearing on high courts when they did Where have women made the most significant strides To address these questions the authors built the first cross-national and longitudinal dataset on the appointment of women and men to high courts In addition they provide five in-depth country case studies to unpack the selection of justices to high courts in Canada Colombia Ireland South Africa and the United States The cross-national lens and combination of quantitative analyses and detailed country studies examines multiple influences across region and time Focusing on three sets of explanations pipelines to high courts domestic institutions and international influences analyses reveal that women are more likely to first appear on their country's high court when traditional ideas about who can and should be a judge erode In some countries international treaties regional emulation and women's international NGOs play a

role in disseminating and linking global norms of gender equality in decision making. Importantly, while informal institutions and reliance on men dominated networks can limit access, women are making substantial strides in their countries' highest courts where the supply grows and often where selectors have incentives to select women. Further sustained pressure from advocacy organizations at the local, national and global levels contributes to some gains. Introducing RDA Chris Oliver, 2021-04-06. Since Oliver's guide was first published in 2010, thousands of LIS students, records managers and catalogers and other library professionals have relied on its clear, plainspoken explanation of RDA (Resource Description and Access) as their first step towards becoming acquainted with the cataloging standard. Now reflecting the changes to RDA after the completion of the 3R Project, Oliver brings her Special Report up to date. This essential primer concisely explains what RDA is, its basic features and the main factors in its development, describes RDA's relationship to the international standards and models that continue to influence its evolution, provides an overview of the latest developments focusing on the impact of the 3R Project, the results of aligning RDA with IFLA's Library Reference Model (LRM) and the outcomes of internationalization, illustrates how information is organized in the post-3R Toolkit and explains how to navigate through this new structure and discusses how RDA continues to enable improved resource discovery both in traditional and new applications including the linked data environment.

Proportionality and Facts in Constitutional Adjudication Anne Carter, 2022-01-27. This book considers the relationship between proportionality and facts in constitutional adjudication. Analysing where facts arise within each of the three stages of the structured proportionality test: suitability, necessity and balancing, it considers the nature of these facts vis-à-vis the facts that arise in the course of ordinary litigation. The book's central focus is on how proportionality has been applied by courts in practice and it draws on the comparative experience of four jurisdictions across a range of legal systems. The central case study of the book is Australia, where the embryonic and contested nature of proportionality means it provides an illuminating study of how facts can inform the framing of constitutional tests. The rich proportionality jurisprudence from Germany, Canada and South Africa is used to contextualise the approach of the High Court of Australia and to identify future directions for proportionality in Australia at a time when the doctrine is in its formative stages. The book has three broad aims. First, it considers the role of facts within proportionality reasoning. Second, it offers procedural insights into fact-finding in constitutional litigation. Third, the book's analysis of the dynamic Australian case law on proportionality means it also serves to clarify the nature and status

of proportionality in Australia at a critical moment Since the 2015 decision of *McCloy v New South Wales* where four justices supported the introduction of a structured three part test of proportionality the Court has continued to disagree about the utility of such a test These developments mean that this book with its doctrinal and comparative approach is particularly timely

Peter Akinola: Who Blinks First? Gbenga

Gbesan,2020-03-30 To the astonishment and dismay of Anglican leadership in the Global North Nigeria's Archbishop Peter Akinola led the Global South's revolt against the campaign to normalize homosexuality within the global Anglican communion. For this he was twice recognized by Time magazine as one of the 100 Most Influential People on earth. As shepherd of an immense Nigerian flock he joined arms with like-minded archbishops in Africa, Asia and South America to insist that the church be guided by the Bible rather than culture. Here is the remarkable story of this conflict from its social beginnings in nineteenth-century Germany through the renegade behavior of national churches in Canada, the United States and the United Kingdom on to gatherings addressing the issues from Dromantine Northern Ireland to Kuala Lumpur, Malaysia. At one point Archbishop of Canterbury Rowan Williams, who had been enabling the progressives, challenged Archbishop Akinola. We shall see who blinks first. Since that day it is clear that neither Akinola nor his colleagues have blinked. Indeed, through the formation of GAFCON (Global Anglican Future Conference) and union with biblically faithful Anglicans in the Global North, they are pressing their cause with an eye toward the next decennial assembly of bishops at Lambeth.

Related Party Transactions and Corporate Groups Ivan Romashchenko,2020-03-06 In a market environment where economic actors conduct themselves as diligent and conscientious managers, the regulation of related party transactions (RPTs) would be largely irrelevant. Unfortunately, the corporate reality is far from an ideal world that is innocent of market abuse and corporate fraud. It remains necessary to protect minority shareholders from the wrongdoings of majority shareholders and to protect all shareholders from opportunistic managerial behaviour. This timely book, the first on the subject since implementation of the European Union's EU's revised Shareholders Rights Directive, provides in-depth analysis of how and to what extent RPTs are covered by existing legal requirements on capital protection and corporate group regulation, highlighting experiences and strategies adopted in Germany, Poland and the Netherlands as examples for Eastern European countries and in particular Ukraine. Beyond his comparative analysis of the current status, the author offers recommendations for more effective handling of RPTs, investigating such aspects as the following: what constitutes a corporate group and how group issues are regulated in the various legal systems; what constitutes a conflict of interest originating in ownership and control and what types of such conflicts occur; whether RPTs within corporate groups should receive special treatment relative to transactions outside groups; combatting corporate raiding, most often carried out through illegal seizure of corporate assets; approval and disclosure requirements for RPTs; and how information about RPTs is disclosed publicly. Drawing on resources including legislation, case law, scholarship and intensive discussions with practicing lawyers from several jurisdictions, the author underscores the imperative of establishing limitations and requirements that oblige a company's officers, shareholders and other potential related parties to follow certain rules whenever they wish to enter into an RPT. As a contribution to the debate about the convergence between EU corporate law and that of major eastern European states, the book has no peers. Practitioners in both East and West who advise on compliance with regulations for RPTs or

represent stakeholders interests against abusive RPTs will ensure appropriate remedies and protection mechanisms for their clients
