Advancing Africa's Sustainable Development Alain L. Fymat, 2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development the situation is progressively improving This is why the Society for the Advancement of Science in Africa was established to contribute to economic advancement and sustainability through science research education and innovation This book provides a selection of papers from the Advancement of Science in Africa's fourth annual conference The conference was held under the overarching theme of science technology and innovation in Africa with several important sub themes including but not limited to improving health research and disease surveillance education collaborating in research responding to epidemic diseases with high mortality in Africa and promoting women's interest in science careers The collection illustrates how although the chapter contributors come from various countries and universities representing their own academic research they all share a common interest in advancing science technology and innovation in Africa

Leveraging Wikipedia Merrilee Proffitt, 2018-11-29 The vision statement of the Wikimedia Foundation states Imagine a world in which every single human being can freely share in the sum of all knowledge Libraries need not see Wikipedia as competition rather failing to leverage its omnipresence in the online world constitutes a missed opportunity As a senior program officer at OCLC Proffitt has encouraged collaboration between Wikipedia and cultural heritage institutions leading to increased visibility and user engagement at participating organizations Here she brings onboard a raft of contributors from the worlds of academia archives libraries and members of the volunteer Wikipedia community who together point towards connecting these various communities of knowledge This book will inspire libraries to get involved in the Wikipedia community through programs and activities such as hosting editathons contributing content and helping to bridge important gaps in Wikipedia ensuring that library content is connected through the world's biggest encyclopedia working with the Wikipedia education community and engaging with Wikipedians as allies in a quest to expand access to knowledge Speaking directly to librarians this book shows how libraries can partner with Wikipedia to improve content quality while simultaneously ensuring that library services and collections are more visible on the open web

Promoting Biodiversity in Food Systems Irana W. Hawkins, 2018-10-25 Biodiversity of the food system is crucial for food production and loss of biodiversity is a pressing issue

This book focuses on biodiversity's crucial role in food systems health and well-being and fate of the natural environment. It provides practical recommendations on how proper food systems can sustain a healthier planet and protect biodiversity. Sections provide a comprehensive understanding of the urgent need for promoting biodiversity, promoting food systems that help maintain planetary boundaries that are at risk, mimic the natural processes of highly integrated ecosystems and improve human planetary health while providing a wholesome and sufficient food supply. **The China Race** Fei-Ling

Wang, 2024-02-01 Following its two prequels *The China Order* 2017 and *The China Record* 2023, this book analyzes the China Race, the global competition for power and leadership between the US-led West and the People's Republic of China. Considering the organizational options and optimality with respect to human civilization, Fei-Ling Wang discusses two alternative world orders: the Westphalian System of international relations and a centralized world political unification. Both are feasible and existed before but with drastically different desirability. The rising power of the PRC state has consistently and methodically sought to recenter and reorganize the world to safeguard and promote its autocracy and ultimately build a world empire. Examining the nature, aims, means, accomplishments, pitfalls, and failures of Beijing's foreign policy and the state of and developments in Sinology and the West's China policy, Wang focuses on the existential PRC-USA rivalry and proposes a holistic strategic framework discussing three ranked objectives for the West and the world, including the Chinese people to manage, benefit from, and prevail in the China Race.
