

What Is Morality?

We are discussing no small matter, but how we ought to live.
SOCRATES, AS REPORTED BY PLATO IN *THE REPUBLIC* (CA. 380 B.C.)

1.1. The Problem of Definition

Moral philosophy is the attempt to achieve a systematic understanding of the nature of morality and what it requires of us—in Socrates's words, of "how we ought to live," and why. It would be helpful, therefore, if we could begin with a simple, uncontroversial definition of what morality is. But that turns out to be impossible. There are many rival theories, each expounding a different conception of what it means to live morally, and any definition that goes beyond Socrates's simple formulation is bound to offend one or another of them.

This should make us cautious, but it need not paralyze us. In this chapter I will describe what I call the "minimum conception" of morality. As the name suggests, the minimum conception is a core that every moral theory should accept, at least as a starting point. We will begin by examining some recent moral controversies. The features of the minimum conception will emerge from our consideration of these examples.

1.2. An Infant with No Prospects: Baby Theresa

Theresa Ann Campo Pearson, an anencephalic infant known to the public as "Baby Theresa," was born in Florida in 1992. Anencephaly is among the worst congenital disorders. Anencephalic infants are sometimes referred to as "babies without brains," and this gives roughly the right picture, but it is not quite accurate. Important parts of the brain—the cerebrum and cerebellum—are missing, as well as the top of the skull. There is, however, a

brain-stem, and so autonomic functions such as breathing and heartbeat are possible. (In the United States, most cases of anencephaly are detected during pregnancy and aborted. Of those not aborted, half are stillborn. About 300 each year are born alive, and they usually die within a few days.)

Baby Theresa's story would not be remarkable except for an unusual request made by her parents. Knowing that their baby could not live long and that, even if she could, she would never have a conscious life, Baby Theresa's parents volunteered her organs for transplant. They thought her kidneys, liver, heart, lungs, and eyes should go to other children who could benefit from them. The physicians agreed that this was a good idea. At least 2,000 infants need transplants each year, and there are never enough organs available. But the organs were not taken, because Florida law does not allow the removal of organs until the donor is dead, and by the time Baby Theresa had died, nine days later, it was too late for the other children—her organs could not be transplanted because they had deteriorated too much.

The newspaper stories about Baby Theresa prompted a great deal of public discussion. Would it have been right to remove the infant's organs, thereby causing her immediate death, to help other children? A number of professional "ethicists"—people employed by universities, hospitals, and law schools, whose job it is to think about such matters—were called on by the press to comment. Surprisingly few of them agreed with the parents and physicians. Instead they appealed to time-honored philosophical principles to oppose taking the organs. "It just seems too horrifying to use people as means to other people's ends," said one such expert. Another explained, "It is unethical to kill in order to save. It's unethical to kill person A to save person B." And a third added: "What the parents are really ask-

The Benefits Argument. The parents' suggestion was based on the idea that, because Theresa was going to die soon anyway, her organs were doing her no good. The other children, however, could benefit from them. Thus, their reasoning seems to have been:

- (1) If we can benefit someone, without harming anyone else, we ought to do so.
- (2) Transplanting the organs would benefit the other children without harming Baby Theresa.
- (3) Therefore, we ought to transplant the organs.

Is this a sound argument? It may be objected that removing the organs would harm Theresa, because without them she would die. But that seems like a very superficial view of the matter. Being alive is a benefit only if it enables one to carry on activities and have thoughts, feelings, and relations with other people. In the absence of such things, mere biological existence is worthless. Therefore, even though Theresa might remain alive for a few more days, it would do her no good. (We might imagine circumstances in which other people would gain from keeping her alive, but that is not the same as her benefiting.) But suppose we were to concede, for the sake of argument, that keeping Theresa alive would benefit her. Even if this were true, it would do her only a little good, while transplanting the organs would do so much more good for the other children that, everything considered, it still might be best to perform the transplant.

Therefore, the Benefits Argument provides a powerful reason for transplanting the organs. What are the arguments on the other side?

The Argument That We Should Not Use People as Means. The commentators who opposed the transplant offered two argu-

The Elements of Justice David Schmidtz, 2006-01-09 What is justice Questions of justice are questions about what people are due However what that means in practice depends on the context in which the question is raised Depending on context the formal question of what people are due is answered by principles of desert reciprocity equality or need Justice therefore is a constellation of elements that exhibit a degree of integration and unity Nonetheless the integrity of justice is limited in a way that is akin to the integrity of a neighborhood rather than that of a building A theory of justice offers individuals a map of that neighborhood within which they can explore just what elements amount to justice
