percent of the Georgia white population owned slaves in 1850 In fact by far the largest number of slave owners were concentrated in Glynn County a coastal county known for its rice production The slave owners census is arranged in alphabetical order according to the surname of the slave owner and gives his her full name number of slaves owned and the county of residence It is one of the great disappointments of the ante bellum U S population census that the slaves themselves are not identified by name rather merely as property owned Nevertheless now that Mr Cox has made the names of these Georgia slave owners with their aggregations of slaves more widely available it may be just possible that more persons with slave ancestors will be able to trace them via other records property records for example pertaining to the 37 000 slave owners enumerated in this new volume **Jet** ,1986-04-21 The weekly source of African American political and entertainment news
