web oct 31 2021 explain that heat is the flow of energy from hot materials to cold materials describe that molecules in a material begin to vibrate or move more quickly when the material is heated identify conduction as heat transfer within and between solids identify convection as heat transfer involving gases or liquids

physical science thermal energy chapter 5 worksheet quizlet - May 14 2023

web flashcards learn test match created by allisondayhoward17 terms in this set 12 temperature the increases when the average kinetic energy of the particles in a material increases radiation thermal energy transfer that does not require matter is heat thermal energy that flows from a higher to a lower temperature is

chapter 5 thermal energy houston independent school district - Apr 01 2022

web how does thermal energy change the thermal energy of an object changes when heat flows into or out of the object you can use the following equation to calculate the change in thermal energy change in thermal energy j mass kg change in temperature c specific heat j kg c q m t f t i c
