## M.G. MAGNETTE (Series ZA)

### 1953-4 Models

Manufacturers: M.G. Car Co., Ltd., Abingdon-on-Thames

All rights reserved. This Service Data Sheet is compiled by the technical staff of MOTOR TRADER and BRITISH AUTOMOBILES OVERSEAS, and is checked by the vehicle manufacturers. It is the copyright of these journals, and may not be reproduced, in whole or in part, without permission.

**I**NTRODUCED in 1953 at the Earls Court Motor Show, the Magnette appeared as an entirely new sports saloon in the 1,500 c.c. class. Many new features of design and construction are embodied in this car and whereas some major components bear a resemblance to earlier units of Morris or Austin construction, they are now standardised B.M.C. products. An overhead valve, twin carburettor engine of relatively high compression ratio is employed and transmission of the drive is taken through an hydraulically operated clutch and synchromesh gearbox to a new type hypoid bevel rear axle. Some detail modifications have been made since the original chassis specification, and these are set out in the tabular data in these pages.

Identification of the vehicle is by model, car and engine numbers. Model and car numbers are stamped on a plate secured to the dash, underneath the bonnet on the outside of the car. The engine number is to be found stamped on a disc secured to the engine crankcase. These numbers should be quoted in all communications with the manufacturers or when obtaining spare parts.

Screwed components are being manufactured with Unified screw threads in increasing numbers and the general standardization classification scheme facilitates identification. It should be noted that nuts, bolts and screws marked as having Unified threads are not interchangeable with B.S.F. or Whitworth threaded parts, though for all practical purposes the U.N.F. thread is interchangeable with the A.N.F. thread. In cases of doubt, care should be taken to see that screwed components are reassembled as they were dismantled.

Special tools listed in these pages are designed to speed up operations of overhaul, and many of these tools will be found to suit other vehicles in the B.M.C. range.
