Overview

The MICROS® Workstation 5 point-of-sale (POS) terminal combines the high performance and reliability CBORD® customers have come to expect. Featuring a 15" bright color touch screen display, solid-state design, and a multitude of peripheral options, the Workstation 5 is ideal for college dining environments.

Latest Technology

Instead of a hard drive common in PC-based POS terminals, the Workstation 5 uses internal solid-state flash storage and a removable compact flash card. The AMD Geode LX 800 processor and other internal components were selected for their reliability and low power usage. In addition, the Workstation 5 has a screen-saver function to reduce power consumption and preserve the life of the LCD touch screen.

The Workstation 5 comes preinstalled with Microsoft® Windows® Embedded CE 6.0. This provides a number of advantages, such as lower cost and less maintenance than desktop operating systems, as well as remote and unattended operating system upgrades.

Fast and Easy Installation

The Workstation 5 arrives preloaded with the MICROS Client Application Loader (CAL), a revolutionary embedded software update agent that automates and simplifies software installation and maintenance. When booted up, the Client Application Loader seeks out the MICROS server and generates a list of workstations. Simply choose the workstation's identity, and CAL does the rest—downloading the application and configuration information.

Quick Replacement

A removable compact flash card stores all system configuration, the POS application, and offline transaction totals. In the event of a hardware failure, simply remove the compact flash card from the disabled unit and place it in a replacement unit. No reconfiguration is required.

The Workstation 5 is also equipped with a Factory Recovery tool that allows a technician to quickly and easily restore a workstation to factory-fresh configuration in less than two minutes.
