

Science Unit Heat & Thermal Energy

Temperature is how **hot** or **cold** something is.

A thermometer is a tool used to measure temperature.

A thermometer can be used to tell how hot or cold it is outside. It can tell if you have a fever. It can tell the temperature inside your house.

Thermal Energy
All the things around us are made of matter. Matter is made up of very small particles that you cannot see unless you are using a microscope. These particles are always moving. The energy of moving molecules is called thermal energy. The more thermal energy an object has, the faster the particles move. Thermal energy flows from objects to cool objects.

A good design goes hand in hand with a good idea. The design of a product is not just about how it looks, but also about how it works. A good design is one that is both functional and aesthetically pleasing. It is one that is easy to use and that meets the needs of the user. A good design is one that is both practical and beautiful. It is one that is both useful and enjoyable. It is one that is both functional and aesthetically pleasing. It is one that is easy to use and that meets the needs of the user. A good design is one that is both practical and beautiful. It is one that is both useful and enjoyable. It is one that is both functional and aesthetically pleasing. It is one that is easy to use and that meets the needs of the user.
