

ENGINE MECHANICAL - EM

ZD30DDTi Fuel Pump Removal

Refer to section EC of the Service Manual for the removing & re-installing the Fuel Pump procedure. The new pump is now much simpler to remove & re-install than the previous VP44 unit.

The procedure involves the disconnection of the fuel lines & electrical plug. The pump is attached to the engine with 3 x forward facing bolts. The pump simply detaches from the engine **without** the need to remove any timing gears etc.

NOTE: When removing the Fuel Pump, there is **NO NEED** to remove the bolts located behind the pump drive gear. Only remove the bolts marked *1 in the diagram and the pump is removed rearwards.

The other bolts shown attached the pump mounting / drive unit to the engine & they can only be accessed by 1st removing the front timing chain / gear cover & fuel pump drive gear.
