

With a project that is vital to the overall energy needs of the country as well as the chance that environmental damage could severely scar the landscape that it is located in, there are several ethical concerns that can be considered before going forward with a project:

- **Environmental disturbances**
 - One could argue that even though a small piece of land is being taken to run the pipeline on, they are potentially threatening the well-being of any and all wildlife that is in that area.
 - In the event of a major spill, this would also be a major concern that could sever the balance between meeting own energy needs while protecting the environment.
- **Financial distributions to Alaskans**
 - Even though the country and many others are beneficiaries of the additional stocks of oil and other products that are sent through the pipeline, anyone that lives in Alaska receives a royalty check from the proceeds of the sale of oil on their land.
 - Should there be equal benefit to every person and not just one state in this case? This is a question that could come up with one arguing that equal benefits are not exercised.
 -
- **Regulatory commissions**
 - One of the biggest challenges with this is whether or not someone feels they are tipping in the favor of the oil companies and state of Alaska and not acting in the best interest of the country and regulations that are set forth.
 - Worse yet, are they potentially bribed to work in one way or another?
- **Worker safety concerns**
 - How are the workers remaining safe on the job in the harsh conditions that the pipeline is going through?
 - This includes safety gear, defensive to wild animals, etc.
 - Another challenge is whether or not they have the right equipment for the job and if so, where it is coming from?
- **Contractors**
 - There is much debate as to whether or not local construction crews were picked over larger national firms to do the job. Though it is common to go for the lowest price, a project that is this vital to the overall successfulness of the country should be given equal priority to both local and national firms.
