Equations of Mathematical Physics A. N. Tikhonov, A. A. Samarskii, 2013-09-16 Mathematical physics plays an important role in the study of many physical processes hydrodynamics elasticity and electrodynamics to name just a few Because of the enormous range and variety of problems dealt with by mathematical physics this thorough advanced undergraduate or graduate level text considers only those problems leading to partial differential equations Contents I Classification of Partial Differential Equations II Evaluations of the Hyperbolic Type III Equations of the Parabolic Type IV Equations of Elliptic Type V Wave Propagation in Space VI Heat Conduction in Space VII Equations of Elliptic Type Continuation The authors two well known

Russian mathematicians have focused on typical physical processes and the principal types of equations dealing with them. Special attention is paid throughout to mathematical formulation, rigorous solutions, and physical interpretation of the results obtained. Carefully chosen problems designed to promote technical skills are contained in each chapter along with extremely useful appendixes that supply applications of solution methods described in the main text. At the end of the book, a helpful supplement discusses special functions including spherical and cylindrical functions.
