Computer Science Jenny Carter, Michael O'Grady, Clive Rosen, 2018-09-21 There is currently a great emphasis on teaching quality in Higher Education In the UK the Teaching Excellence Framework and the National Student Survey have contributed significantly to this focus Additional support for staff to develop teaching skills has also come from the Higher

Education Academy whose fellowship scheme encourages HE staff to focus on their practice in the classroom The growth in the number of students attending university has resulted in a much wider range of learning styles amongst them Many students do not fit the idealised average of being adept at learning from primarily text based media Two further trends are also driving change and innovation in academic staff teaching The first is the availability of online teaching materials such as MOOCs The second is the emphasis now given to student postgraduate employability represented by certain aspects of the Teaching Excellence Framework that require students not only to know information but also to be able to articulate that knowledge and to demonstrate their skills With a desire to enable our students to achieve their highest potential many staff undertake initiatives to facilitate learning that accommodate a wide range of learning styles This book focuses on approaches to teaching and learning within the discipline of Computer Science The book consists of a selection of chapters that describe a particular teaching activity or topic within Computing in HE presented in such a way that other practitioners can adopt and adapt them as a way of helping them to develop their own teaching It provides a number of practical cases of putting theory into practice when teaching Computer Science to both undergraduate and postgraduate students in Higher Education institutions A chapter on the importance of developing soft skills and a professional online presence is also included as an essential part of preparing the students for their future employment

China's Eurasian Dilemmas R. James Ferguson, 2018-08-31 Providing a timely analysis of China's engagement with Eurasia R James Ferguson focuses on the challenges obstructing China's path to becoming a sustainable global power Engagement across Eurasia presents China its leaders and policymakers with intensified contact with regional and national conflicts posing environmental developmental and strategic dilemmas

From Wounded Knee to Checkpoint Charlie György Ferenc Tóth, 2016-04-21 From Wounded Knee to Checkpoint Charlie examines the history of the transatlantic alliance between American Indian sovereignty activists and Central European solidarity groups and their entry into the United Nations in the 1970s and 1980s In the late Cold War Native American activists engaged in transnational diplomacy for nation building by putting outside pressure on the US government for a more progressive Indian policy that reached for the full decolonization of Native American communities into independence By using extensive multinational archival research complemented by interviews György Ferenc Tóth investigates how older transatlantic images of American Indians influenced the alliance between Native activists and Central European groups how this coalition developed and functioned and how the US government and the regimes of the Eastern Bloc responded to this transatlantic alliance This book not only places the American Indian radical sovereignty movement in an international context but also recasts it as a transnational struggle thus connecting domestic US social and political history to the history of Cold War transatlantic relations and global movements
