T. Lim, 2014-10-19 As children we would have spilt glasses of milk dropped things and broken things As children therefore we would have developed intuitions about how the world works but we would not necessarily have been able to explain these workings It would only have been till we entered formal schooling that we would have learned codifications of canon within each respective discipline and consequently how to articulate the canon to explain the intuition The preceding example was from the natural sciences but one could just have easily taken an example from say the environmental sciences or from the social sciences Indeed much of this book does just that as it seeks to chart the territory of a new theory of learning around Disciplinary Intuitions Many of the chapters within draw frequent and explicit linkages to curriculum design from the premise of the need to go beyond addressing the conceptions of learners to seeking to understand the substrate upon which

these conceptions are founded The argument is made that this substrate comprises the particular set of lived experiences of each learner and how because these lived experiences are as tacit as they are diverse designing curriculum around misconceptions and preconceptions alone would not lead to enduring understanding from first principles From this perspective Disciplinary Intuitions constitute an exciting field at the nexus of learning theories and curriculum design

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson,Frans

Prins,2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for

student learning to share explicit assessment criteria and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

Best Practices in English Teaching and Learning in Higher Education Lillian L. C. Wong, 2023-11-24 Lillian Wong brings together evidence-informed studies which are at the forefront of higher education developments in English language teaching and learning and shares expertise from prominent academics in Hong Kong. Written by experienced practitioners who are active in the evolving field of scholarship of teaching and learning, it provides accessible and engaging insights into best practices in new and innovative areas such as communities of practice, scholarship, big data analytics, digital literacies, blended learning, small private online courses, dialogic use of exemplars, students as tutors and critical thinking. The book covers best practices in three interrelated key areas in university English language education: curriculum design and pedagogy; use of technologies and the teaching and learning of English in the disciplines; linking theory and practice. The chapters discuss the emphasis on EAP/ESP in university English language education, how technological developments are impacting the field and the implications for further research and the teaching of English in higher education. This resourceful collection is essential reading for teachers in service and in training or those working in language education at the tertiary level where English is being used as an academic lingua franca, a medium of instruction or where EAP/ESP plays an important role. Researchers in TESOL and applied linguistics, curriculum designers and leaders, teacher educators and policymakers as well as undergraduate and postgraduate students will also find it valuable.

Designing Effective Feedback Processes in Higher Education Naomi Winstone, David Carless, 2019-06-27 Feedback is one of the most powerful influences on student achievement, yet it is difficult to implement productively within the constraints of a mass higher education system. *Designing Effective Feedback Processes in Higher Education: A Learning Focused Approach* addresses the challenges of developing effective feedback processes in higher education, combining theory and practice to equip and empower educators. It places less emphasis on what teachers do in terms of providing commentary and more emphasis on how students generate, make sense of and use feedback for ongoing improvement. Including discussions on promoting student engagement with feedback, technology-enabled feedback and effective peer feedback, this book contributes to the theory and practice of feedback in higher education by showcasing new paradigm feedback thinking focused on dialogue and student uptake. It synthesises the evidence for effective feedback practice, provides contextualised examples of successful innovative feedback designs analysed in relation to relevant literature and highlights the importance of

staff and student feedback literacy in developing productive feedback partnerships Supports higher education teachers in further developing their feedback practice Designing Effective Feedback Processes in Higher Education A Learning Focused Approach contributes to the theory and practice of higher education pedagogy by re evaluating how feedback processes are designed and managed It is a must read for educators researchers and academic developers in higher education who will benefit from a guide to feedback research and practice that addresses well recognised challenges in relation to assessment and feedback
