

Critical Thinking Essay

Critical thinking and decision making is the process to find the truth. An important aspect of thinking is the process that relies on the ability to coordinate and structure our ideas so that they make sense. Training our mind to use the critical thinking process gives people a better understanding of the information. This paper will discuss the three different thinking styles. It will also compare and contrast logical style, persuasive style, and creative style. Critical thinking will be applied to the decision making process by using work environment examples.

The logical style of thinking is a complex process in which reasoning is used to come to a conclusion. This style involves a sequence of steps or thoughts

used to solve a problem. According to Kirby and Goodpaster (2007), along with creative thought, inductive and deductive logic comprise the bedrock and substance of all our thinking. Using the two major elements of logical thinking, deductive and inductive reasoning, solutions can be tested with tried and true methods. This style is very distinct and follows a more structured and analytical path using proven methods in order to reach the conclusions.

When comparing logical thinking to the creative and persuasive styles of thinking, all three require detailed processes to reach conclusions. With the creative style, the conclusions are inspired by the ideas that can be gathered using metaphors, brainstorming and starbursting. While the persuasive style of thinking can incorporate biases, ~~emotion~~, motivation and even manipulation, it usually requires some sort of credibility to be successful.

Logical thinking affects the critical thinking process because it uses Deductive thinking which "is the kind of reasoning that begins with two or more premises and derives a conclusion that must follow from those premises, a conclusion" (Kirby and Goodpaster, 2007) and inductive reasoning which "usually begins with a set of evidence or observations" (Kirby and Goodpaster, 2007). All three thinking styles are required in the critical thinking process in order reach a valid and sound conclusion.

In real estate, all three of these styles of thinking must be incorporated. For example, when taking on a new listing, a detailed step-by-step process must be followed. This series of paperwork is very straight forward and completed in sequential order. If this order is not followed correctly, company rules, association bylaws and even board ethics could be violated.

During the marketing phase, creativity is a must in today's world. The listing agent must ask many questions of the seller in order to present the property to the right audience and in the right manner.

When the time comes to show homes to a perspective buyer, the art of persuasion comes to play. The agent must make sure that the properties being shown appeal to the buyer's needs, wants, values and sometimes even egos.

The persuasive thinking style involves getting your audience to believe, go along, or act in accordance with what you want. With this style of thinking, if a person is an effective

New Paradigm for Critical Thinking Mark Battersby, Sharon Bailin, 2018-12-05 This volume reflects the development and theoretical foundation of a new paradigm for critical thinking based on inquiry The field of critical thinking as manifested in the Informal Logic movement developed primarily as a response to the inadequacies of formalism to represent actual argumentative practice and to provide useful argumentative skills to students Because of this the primary focus of the field has been on informal arguments rather than formal reasoning Yet the formalist history of the field is still evident in its emphasis with respect to both theory and pedagogy on the structure and evaluation of individual de contextualized arguments It is our view that such a view of critical thinking is excessively narrow and limited failing to provide an understanding of argumentation as largely a matter of comparative evaluation of a variety of contending positions and arguments with the goal of reaching a reasoned judgment on an issue As a consequence traditional critical thinking instruction is problematic in failing to provide the reasoning skills that students need in order to accomplish this goal Instead the goal of critical thinking instruction has been seen largely as a defensive one of learning to not fall prey to invalid inadequate or fallacious arguments **Super 10 CBSE Class 12 English Core 2023 Exam Sample Papers with**
