Fundamentals of Process Safety Engineering Samarendra Kumar Biswas, Umesh Mathur, Swapan Kumar Hazra, 2021-08-16 This textbook covers the essential aspects of process safety engineering in a practical and comprehensive manner. It provides readers with an understanding of process safety hazards in the refining and petrochemical industries and how to manage them in a reliable and professional manner. It covers the most important concepts: static electricity, intensity of thermal radiation, thermodynamics of fluid phase equilibria, boiling liquid expanding vapor explosion (BLEVE), emission source models, hazard identification methods, risk control, and methods for achieving manufacturing excellence while also focusing on safety. Extensive case studies are included. Aimed at senior undergraduate and graduate chemical engineering students and practicing engineers, this book covers process safety principles and engineering practice authoritatively with comprehensive examples. Fundamentals, methods, and procedures for the industrial practice of process safety engineering. The thermodynamic fundamentals and computational methods for release rates from ruptures in pipelines, vessels, and relief valves. Fundamentals of static electricity hazards and their mitigation. Quantitative assessment of fires and explosions. Principles of dispersion calculations for toxic or flammable gases and vapors. Methods of qualitative and quantitative risk assessment and control. Research Methods for Public Administrators Gary Rassel, Suzanne Leland, Zachary Mohr, Elizabethann O'Sullivan, 2020-12-29 Research Methods for Public Administrators contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic statistics to more advanced techniques. The basics of conducting experiments, survey research, case studies, and focus groups are discussed. Data organization, management, and analysis are also covered, as are data analysis and hypothesis testing. Descriptive and inferential statistics are discussed and illustrated with examples. The book also includes a chapter on obtaining and analyzing secondary data already collected for other purposes and a chapter on reporting and presenting research results to a variety of audiences. This is a general textbook written primarily for students of public administration and practitioners in public and not-for-profit organizations. It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies. The material is discussed at a level to be accessible and with enough detail to be useful. New to the seventh edition: Additional and expanded material on qualitative research, big data, metadata, literature reviews, and causal inference. New material on experiments and experimental research. New examples and case studies including those dealing with public policy. Expanded material on using computers for data management. Information on new NSF and NIH ethics and protection of human subjects requirements for researchers. New data sets and Power Point slides for

The Quest of the Absolute Louis Dupré, 2013-09-30 This eagerly awaited study brings to completion Louis Dupr s planned trilogy on European culture during the modern epoch Demonstrating remarkable erudition and sweeping breadth The Quest of the Absolute analyzes Romanticism as a unique cultural phenomenon and a spiritual revolution Dupr philosophically reflects on its attempts to recapture the past and transform the present in a movement that is partly a return to premodern culture and partly a violent protest against it Following an introduction on the historical origins of the Romantic Movement Dupr examines the principal Romantic poets of England Wordsworth Coleridge Shelley Keats Germany Goethe Schiller Novalis Holderlin and France Lamartine de Vigny Hugo all of whom from different perspectives pursued an absolute ideal In the

chapters of the second part he concentrates on the critical principles of Romantic aesthetics the Romantic image of the person as reflected in the novel and Romantic ethical and political theories In the chapters of the third more speculative part he investigates the comprehensive syntheses of romantic thought in history philosophy and theology The Quest of the Absolute is an important work both as the culmination of Dupr s ongoing project and as a classic in its own right The book will meet the expectations of the specialist as well as appeal to more general readers with philosophical cultural and religious interests
