

Excretory System

You drink plenty of liquids. Water, soda, juice, milk, and others, plus, there are also liquids in the solid foods you eat. Where does it all go, and what happens to it once it goes there?

The **excretory system** of the body controls all the fluids entering or leaving your body. The system removes excess and unnecessary fluids from the body.

The organs include the kidneys, lungs, liver, and the skin. Each of the organs have a responsibility in the system, but the kidneys are the main organs of the excretory system. In addition, the urinary system is a part of the excretory system. The **urinary system** controls the balance of water and chemicals in the body for it to function properly. The system works with the lungs, kidneys, and the intestines. The urinary system produces, stores, and eliminates **urine** (pee), which is the fluid released by the kidneys. Other parts of the excretory system include the ureters, bladder, and urethra.

FrimThom Integrated Science for Senior High Schools Thomas Kofi Arboh, Emmanuel Yaw Frimpong, 2025-04-29

The diversity of teaching skills and methods as applied in the classroom mostly results in the variation in understanding on the part of the learner. Not having a clear cut material for teaching also puts pressure on the teacher when it comes to gathering information to deliver in the classroom. Having a more simplified and straightforward text material without compromising on value of content is the main aim of this book. Materials are well selected to make learning and teaching easier for the user of this book. The senior high school student is the main targeted end user of this book. However, it can also serve as a reference material for other levels of learning. The content is based on the Ghanaian and West African syllabus for senior high education. This integrated science textbook has its content organized in sections, units, and academic year. Year 1 content provides foundation tutoring. Year 2 is built on the content of year 1, likewise year 3 has its content built on that of year 2. This approach renders a vertical upward systematic approach to learning that enables the learner to build upon previous knowledge. Reference materials, tables, charts, and units are also provided to assist the learner in doing research or performing experiments. It is our hope that this textbook will satisfy teachers and learners at the senior high level of education in the area of integrated science comprising of basic biology, physics, chemistry, agriculture, and indigenous technology.

Tools for Teaching Conceptual Understanding, Secondary Julie Stern, Krista Ferraro, Juliet

Mohnkern, 2017-02-02. Students become experts and innovators through Concept Based teaching. Innovators don't invent without a deep understanding of how the world works. With this foundation, they apply conceptual understanding to solve new problems. We want our students to not only retain ideas but relate them to other things they encounter using each new situation to add nuance and sophistication to their thinking. To do this, they need conceptual understanding. This book serves as a road map for Concept Based teaching. Discover how to help students uncover conceptual relationships and transfer them to new situations. Specifically, teachers will learn Strategies for introducing conceptual learning to students. Four lesson frameworks to help students uncover conceptual relationships. How to assess conceptual understanding and How to differentiate concept based instruction. Look no further. For deep learning and innovative thinking, this book is the place to start. The authors tear down the false dichotomies of traditional vs innovative education and provide a practical toolkit for developing creativity and applying knowledge through Concept Based learning. Every practitioner needs this book to juxtapose what worked well in the 20th Century with what is essential in the 21st Century and beyond. Michael McDowell, Superintendent, Ross School District, Ross, CA. While most good educators recognise the incredible value of teaching conceptually, it is challenging. The authors have created accessible practical baby steps for every teacher to use. Dr Vincent Chan, principal, Fairview International School, Kuala Lumpur, Malaysia.
