Revisiting the Law of Occupation Hanne Cuyckens, 2017-10-23 In Revisiting the Law of Occupation Hanne Cuyckens assesses the crucial challenges faced by the law of occupation Through examples such as the occupation of the Palestinian Territories and the 2003 occupation of Iraq the author convincingly demonstrates that although the law of occupation may no longer be perceived as adequate to address contemporary forms of occupation a formal modification of the law is neither desirable nor feasible The author identifies means by which the potential dichotomy between the law and the facts can be addressed without formal modification of the former 1 flexible interpretation of the law itself 2 the role of International Human Rights law as gap filler and 3 the role of the UNSC as a modulator of the law Modeling Economic Growth in Contemporary Greece Vasileios Vlachos, Aristidis Bitzenis, Bruno S. Sergi, 2021-11-04 Modeling Economic Growth in Contemporary Greece assesses the conditions shaping the Greek economy's restart discussing the effect of institutions on the business environment and highlighting the factors which are critical for achieving sustainable economic growth

probably last longer in the coming years Moreover hydrocarbon explorations in the region will increase the expectations regarding an ice free Arctic since the economic potential of the region is rising to the surface Under these circumstances the Arctic has recently been witnessing both challenges and opportunities The latter includes the exploitation of hydrocarbons and utilization accessible maritime routes both of which are opportunities gathering less attention whereas conflicting issues regarding sovereignty and national security are regularly thematized by politicians and media Here the point is that whereas challenges are being underlined the opportunities are being ignored Put differently while politicians and the media address issues pertaining to the regional policies especially conflicting ones and ecology of the region on the other hand economic potential of the region triggered by the ice melting is paid no mind With this in mind as one of the most significant institutions in the region the Arctic Council aims to manage the issues in question Thus this book aims to provide enlightenment on the Arctic states predominant intent to utilize opportunities under the auspices of the Arctic Council via neoliberal policies The book indicates that the Arctic Council as an example of regime formation could be best understood via neoliberal perspective of regime theory since its members plan to further economic development of the region as a common priority

Residence and Economic Substance of Subsidiary Corporations in International and European Tax Law Savvas Kostikidis,2024-10-10 Series on International Taxation Residence and Economic Substance of Subsidiary Corporations in International and European Tax Law It is well known that multinational corporations establish foreign subsidiaries in great measure to reduce their worldwide tax burden This groundbreaking book examines the content

of the substance requirement in double tax convention residence rules transfer pricing rules anti abuse rules and controlled foreign corporation rules in the context of international and EU tax law disentangling the complex relationship between the substance requirements in these four sets of legal rules Following a descriptive analytic method for each substance requirement of the four sets of legal rules the discussion deals with the content of economic substance in complex scenarios for example holding companies special purpose vehicles loss making subsidiaries subsidiaries with management in more than one state subsidiaries managed by the parent company outsourcing and subsidiaries borrowing the substance of other group companies The author introduces a new method of assessment of substance requirements offering practical solutions for their uniform application in international and European tax law In its thorough examination of how substance requirements work and how they are interrelated among different sets of tax rules this book has no peers It will be welcomed by taxation practitioners and corporate counsel in Europe and worldwide

Economics and Politics Revisited

Timothy Hellwig, Matthew Singer, 2023 The volume highlights how evolving issue agendas are changing the nature of political accountability in advanced industrialized democracies

YSEC Yearbook of Socio-Economic Constitutions 2021 Steffen Hindelang, Andreas Moberg, 2022-07-12 This volume addresses contemporary challenges enabled by modern technology that concern upholding freedom of speech where it conflicts with social rights such as respect for private and family life and with economic rights such as the freedom to conduct business or the right to free movement In today's networked world technological shifts happen faster than most people even realize Some of these shifts have made us all potentially powerful media powerful We used to sit in silence in front of newspapers and TV screens and the world was explained to us by just a few sources Today thanks to the Internet social media and Web 2.0 we can not only share our own thoughts with everyone in a more self-determined way but we can also take part in public debate and even co-shape it ourselves Of course the Internet is not a counter-design to the communication power structures of the past Gains in communicative self-determination are threatened due to algorithmisation platformisation and value extraction from self-created private markets At the same time the empowerment of the individual challenges the old grand speakers who are suddenly detecting fake news echo chambers and filter bubbles everywhere on the Internet Internet-based communication allegedly hinders us from the one truth as if newspaper hoaxes propaganda and narrow-mindedness were an invention of the Internet The current heated debate over fake news copyright and upload filters shows that we are unsure of how to deal with the newer and more complex phenomena of Internet-based speech This is due in no small part to the fact that an important benchmark our constitutional compass is still firmly rooted in the past Constitutions change far more slowly than technologies Societal changes can drive constitutional changes but what about normative content control Today there are already demands for old-school clarity truth filters on social media platforms horrendous sums of liability for platforms that encourage overly thorough cleaning up However it is equally true that private individuals regulate they decide what is found on the Internet and who may post on a

given platform Accounting for all interests at play and striking a fair balance that avoids both a public and private over and under regulation is a complex matter The authors of this volume not only provide reflections in their highly topical contributions but also share their understanding of what constitutes a fair balance within the larger frame of freedom of speech in a digital age

Ecological economics C.M. van der Heide, W.J.M. Heijman, J.H.J. Schaminee, 2025-07-21 A textbook about the nature of economics and the economics of nature Is economic growth the cause of or the solution for biodiversity loss Why do we keep drilling for oil and gas when green energy sources are cheaper And is it possible to protect nature without government intervention The answer to these and other questions lies in economic knowledge But in an age when the boundaries between nature and society are becoming increasingly vague ecology and economics are still worlds apart Not only should economists find out more about ecology ecologists should acquire a better understanding of economic principles and concepts from Adam Smith's invisible hand to the Gini coefficient and from diminishing marginal utility to the Hedonic Pricing method The aim of this book is to provide students with knowledge and an understanding of economic science and to offer them a mindset for tackling the important ecological issues of our time The book demonstrates that economic theories are sometimes part of an ecological problem but can also offer valuable insights in the search for a solution The textbook is intended for use on ecology courses at institutes for professional education and on science courses A strange combination at first glance but having read this book I am convinced of the inextricable link between ecology and economics This book is an eye opener not just for professional and science students but also for policymakers and land managers My interest increased with every page and my knowledge about the interfaces and connections between two interesting disciplines grew considerably Hans van Rooijen Former director of Woodland and Nature Conservation course Hogeschool Van Hall Larenstein the Netherlands Old fashioned administrators and economists have a tendency to regard economics and ecology as counter forces And many nature conservationists don't think that nature should be discussed in terms of economic utility In all honesty both visions are fairly blinkered It goes without saying that nature has a value in itself which is why Natuurmonumenten has worked in this area for more than 110 years But nature also has economic significance and needn't be an obstacle to economic development It can even be an economic multiplier The thinking around synergies between economics and ecology must be intensified to make the world a better place This book can only help Marc van den Tweel Chief Executive Natuurmonumenten Dutch conservation organisation the Netherlands

Ethics in Economics Jonathan B Wight, 2015-04-22 This outstanding book looks at the role of ethics within economic debates going beyond welfare outcomes to examine our moral norms Choice In Ethics and Economics Jonathan B Wight argues that economic life relies on three interrelated ethical systems outcome based duty and rule based and virtue based Integrating contemporary research on

ethics within a historical framework Wight provides a thorough and accessible outline of all three schools explaining how they fit or contrast with the economic welfare model Wight uses these conceptual underpinnings to examine a range of topics such as the 2008 financial crisis the moral limits to markets the findings of experimental economics and the nature of economic justice Wight's analysis is guided by the innovative concept of ethical pluralism the recognition that each system has appropriate applications and that no single framework prevails He makes the case that moving beyond utility maximization can lead to a richer understanding of human behavior and better policy decisions European Yearbook of International Economic Law 2014 Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2014-02-10 In 2014 the global economic system celebrates two anniversaries Seventy years ago on 22 July 1944 at Bretton Woods New Hampshire the Articles of Agreement of the International Monetary Fund IMF and the Articles of Agreement of the International Bank for Reconstruction and Development Worldbank were adopted Since then the global financial and monetary system underwent significant policy changes but the institutional framework remained the same More recently twenty years ago on 15 April 1994 the Final Act of the Uruguay Round of Multilateral Trade Negotiations was signed and its key component the Agreement establishing the World Trade Organization entered into force on 1 January 1995 Even though the beginning of the multilateral trading system dates back to the late 1940s the founding of the WTO constitutes a significant institutional reform which marks the beginning of a new era Anniversaries are usually moments of celebration However even a superficial observer will notice that neither the current international financial and monetary regime nor the international trade regime is in a stage which invites celebration Instead both are facing difficult and fundamental challenges to their very existence from the outside but also from within So while there may be no time to celebrate anniversaries are also often used for reflection about the past and the future Hence EYIEL 5 2014 considers these two anniversaries ample moments to reflect on the legacy and the current status of the main two pillars of International Economic Law in its Part one Part two of EYIEL 5 2014 brings together contributions on the EU's Deep Trade Agenda on Current Approaches to the International Investment Regime in South America on the Multilayered System of Regional Economic Integration in West Africa and on the Tripartite Free Trade Area as well as on India and her Trade Agreements Part three contains treatises of developments in the World Customs Organization the World Intellectual Property Organization and in International Investment Law After the book reviews in Part four EYIEL 5 2014 is complemented with an Annex containing the Case on exchange rate manipulation and crisis caused guarantees to financial institutions and the Best Submissions of the 11th EMC2 ELSA WTO Moot Court Competition of the Harvard team for the complainant and the Leuven team for the respondent The case not only addresses issues of current interest but also links the subjects of our two special focusses nicely together *Global Social Policy* Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has

traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels

The Gamification of Higher Education N. Niman, 2014-07-17 Instead of thinking about education as the mastery of a body of knowledge where the subject matter becomes the focus of our attention The Gamification of Higher Education encourages us to think of it as a process that draws out the best in individuals and prepares them for happy productive and successful lives

A Balancing Act for Brazil's Amazonian States Marek Hanusch, 2023-06-08 Social deprivations coincide with vast deforestation in Brazil's Legal Amazon or Amazonia Poverty reduction and sustainable development require renewed efforts to protect the region's exceptional natural wealth coupled with a shift from an extractive to a productivity oriented growth model

The Accelerating Transport Innovation Revolution George Giannopoulos, John F. Munro, 2019-04-17 The Accelerating Transport Innovation Revolution A Global Case Study based Assessment of Current Experience Cross sectorial Effects and Socioeconomic Transformations offers a comprehensive view of current state of the art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results It offers a fascinating new model of the innovation process based on theories of biological ecosystems general systems theory and basins of attraction represented through space time graphs well known in mathematics Furthermore it considers through a number of dedicated chapters key issues and elements of innovation ecosystems such as Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems Chapter 4 Review of innovation organization and governance in key countries and regions Chapter 5 the role of technological Spillovers Chapter 6 Collection and use of data for innovation monitoring and benchmarking Chapter 7 Intellectual Property protection between competing ecosystems Chapter 8 Economics of innovation Chapter 9 Public and private sector involvement in Transport innovation creation Chapter 10 the role of the individual entrepreneur innovator in energizing change Chapter 11 Finally in Chapter 12 there is a thorough summary of key findings

This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model. It therefore includes ten case studies from the U.S., Europe, and Asia detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned. It does this effectively at five different levels of analysis: i.e. the individual innovator/entrepreneur level, the organization level, government agency or company, the regional ecosystem level, the nation/state level, and the global/systemic or international level. Each level of analysis reveals unique features of the innovation landscape, and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation, especially on a revolutionary scale. The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years, especially in the public sector, there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large-scale revolutionary change as the future unfolds. Thus, a primary theme of the book is that understanding how research results translate into market innovation and implementation, especially understanding the nature of revolutionary innovation, is as important as the creation of innovations themselves. While the focus of the book is on Transportation, the concepts and recommendations presented apply to other fields too. Formulates and presents a workable and comprehensive new model of innovation. Defines and analyzes many concepts and notions related to innovation research and market implementation. Examines the critical factors affecting innovation production and successful commercial implementation of research results. Examines organizational models of coordination, governance, data collection, process analysis, and use of intellectual property tools. Includes recent, well-researched and documented case studies of successful innovation ecosystems across the world, mainly but not only in the Transport field.

Milton Friedman & Economic Debate in the United States, 1932-1972: Volume 2 Edward Nelson, 2020-11-06
Second in a two-volume study of the Nobel Prize winner's long career, Nelson knows more about Milton Friedman's economics than anyone else alive. Business Economics. This study is the first to distill Nobel Prize winner Milton Friedman's vast body of writings into an authoritative account of his research, his policy views, and his interventions in public debate. With this ambitious new work, Edward Nelson closes the gap. Milton Friedman and Economic Debate in the United States is the defining narrative on the famed economist, the first to grapple comprehensively with Friedman's research, output, economic framework, and legacy. This two-volume account provides a foundational introduction to Friedman's role in several major economic debates that took place in the United States between 1932 and 1972. This second volume covers the years between 1960 and 1972, years that saw the publication of Friedman and Anna Schwartz's *Monetary History of the United States*. The book also covers Friedman's involvement in a number of debates in the 1960s and 1970s on topics such as unemployment, inflation, consumer protection, and the environment. As a fellow monetary economist, Nelson writes from a unique vantage point, drawing on both his own expertise in monetary analysis and his deep familiarity with Friedman's writings. Using

extensive documentation the book weaves together Friedman's research contributions and his engagement in public debate providing an unparalleled analysis of Friedman's views on the economic developments of his day No previous biographer has Nelson's deep and sophisticated understanding of monetary economics Economic History **The Emerald Handbook of Digital Media in Greece** Anastasia Veneti, Athina Karatzogianni, 2020-10-22 The Emerald Handbook of Digital Media in Greece Journalism and Political Communication in Times of Crisis presents the empirical applications of digital media in political communication and in a number of social settings including the environment homelessness migration and social movements The Development of European Competition Policy Brian Shaev, Sigfrido M. Ramírez Pérez, 2024-06-03 This book considers a central issue of our time the relationship between the macroeconomic objectives of political parties in democratic countries and the legal framework of market economies The impressive panel of contributors examines social democratic policies on cartels market concentration and competition in different European countries spanning a hundred year period specifically the interwar period the initial postwar period the 1960s and 1970s the 1980s and 1990s and the 2000s This thought provoking volume challenges the dominant belief that the EU's economic system and competition policy were mainly influenced by neoliberal economic thinking instead showing that Keynesian and social democratic positions played a major role in the emergence of this system It will be valuable reading for advanced students researchers and policymakers interested in modern economic history industrial organization political economy European legal history and political science **Competition Law in times of Economic Crisis : in Need of Adjustment ?** Jacques Derenne, Massimo Merola, José Rivas, 2013-12-02 Throughout this unprecedented crisis which is hitting all major economies in the EU the escalation of the Eurozone recession increasingly undermines public confidence in the ability of competitive markets to deliver positive outcomes A debate on the most appropriate way to enforce competition rules in light of the crisis is definitely useful A relaxed stance to competition during difficult periods may be tempting and indeed this has often been the approach used in the past However the enforcement of competition rules is no less important during times of crisis than during normal periods It has also been argued that when public resources are stretched to the limit and businesses are struggling to survive competition authorities should seek to focus their limited resources on those anticompetitive practices which are most detrimental to consumer welfare such as cartels Indeed if over enforcement is perhaps undesirable when the economy is functioning well it will inevitably become more problematic during an economic downturn In addition business managers may be increasingly tempted to resort to anticompetitive practices when faced with economic hardship This book will appeal to judges and lawyers in competition law European law business corporate law and insolvency law the study of European competition law European institutions national competition authorities and companies
