**Landscapes of Collectivity in the Life Sciences** Snait B. Gissis, Ehud Lamm, Ayelet Shavit, 2018-01-12 Broad perspective on collectivity in the life sciences from microorganisms to human consensus and the theoretical and empirical opportunities and challenges Many researchers and scholars in the life sciences have become increasingly critical of the traditional methodological focus on the individual This volume counters such methodological individualism by exploring recent and influential work in the life sciences that utilizes notions of collectivity sociality rich interactions and emergent phenomena as essential explanatory tools to handle numerous persistent scientific questions in the life sciences The contributors consider case studies of collectivity that range from microorganisms to human consensus discussing theoretical and empirical challenges and the innovative methods and solutions scientists have devised The contributors offer historical philosophical and biological perspectives on collectivity and describe collective phenomena seen in insects the immune system communication and human collectivity with examples ranging from cooperative transport in the longhorn crazy ant to the evolution of autobiographical memory They examine ways of explaining collectivity including case studies and modeling approaches and explore collectivity's explanatory power They present a comprehensive look at a specific case of collectivity the Holobiont notion the idea of a multi species collective a host and diverse microorganisms and the hologenome theory which posits that the holobiont and its hologenome are a unit of adaption The volume concludes with reflections on the work of the late physicist Eshel Ben Jacob pioneer in the study of collective phenomena in living systems Contributors Oren Bader John Beatty Dinah R Davison Daniel Dor Ofer Feinerman Raghavendra Gadagkar Scott F Gilbert Snait B Gissis Deborah M Gordon James Griesemer Zachariah I Grochau Wright Erik R Hanschen Eva Jablonka Mohit Kumar Jolly Anat Kolumbus Ehud Lamm Herbert Levine Arnon Levy Xue Fei Li Elisabeth A Lloyd Yael Lubin Eva Maria Luef Ehud Meron Richard E Michod Samir Okasha Simone Pika Joan Roughgarden Eugene Rosenberg Ayelet Shavit Yael Silver Alfred I Tauber Ilana Zilber Rosenberg

**Governance of Dual Use Research in the Life Sciences** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, 2018-12-26 Continuing advances in science and technology offer the promise of providing tools to meet global challenges in health agriculture the environment and economic development some of the benefits are already being realized However such advances have the potential to challenge the oversight systems for responsible conduct of life sciences research with dual use potential research that may have beneficial applications but that also could be misused to cause harm Between June 10 and 13 2018 more than 70 participants from 30 different countries and 5 international organizations took part in an international workshop The Governance of Dual Use Research in the Life Sciences Advancing Global Consensus on Research Oversight to promote global dialogue and increased common understandings of the essential elements of governance for such research Hosted by the Croatian Academy of Sciences and Arts in Zagreb Croatia the workshop was a collaboration among the InterAcademy Partnership the Croatian Academy the Croatian Society for Biosafety and Biosecurity and the U S National Academies of Sciences Engineering and Medicine This publication summarizes the presentations and discussions from the workshop 2025-26 CBSE and States Boards Class-X Social Science YCT Expert Team , 2025 26 CBSE and States Boards Class X Social Science 256 495 E This book contains the previous year solved papers from 2010 to 2023 **International Conference for Innovation in Biomedical Engineering and Life Sciences** Fatimah

Ibrahim, Juliana Usman, Mas Sahidayana Mohktar, Mohd Yazed Ahmad, 2015-11-26 This volumes presents the proceedings of ICIBEL 2015 organized by the Centre for Innovation in Medical Engineering CIME under Innovative Technology Research Cluster University of Malaya It was held in Kuala Lumpur Malaysia from 6 8 December 2015 The ICIBEL 2015 conference promotes the latest researches and developments related to the integration of the Engineering technology in medical fields and life sciences This includes the latest innovations research trends and concerns challenges and adopted solution in the field of medical engineering and life sciences *The Capacity to Innovate* Sarah Giest, 2021 In *The Capacity to Innovate* Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations The book offers a detailed view of the vertical multi level and horizontal dynamics in

clusters and cluster policy and addresses how they are managed and supported Using the biotechnology field as an example Giest highlights challenges in the collaborative efforts of public bodies private companies and research institutes to establish a successful eco system of innovation in this sector The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance Currently governments operate at different levels local to supranational in order to support clusters and cluster policies are often pursued in parallel to other programs As the book shows this can lead to uncoordinated efforts and ineffective cluster strategies Relational dynamics are often overlooked when working backwards from performance indicators since their effects are largely indirect but Giest demonstrates that both the cluster organization and the cluster eco system play a role The Capacity to Innovate advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context

**A Human Rights Framework for Intellectual Property, Innovation and Access to Medicines** Joo-Young Lee, 2016-03-09 This book examines the relationship between intellectual property in pharmaceuticals and access to medicines from a human rights perspective with a view to contributing to the development of a human rights framework that can guide States in enacting and implementing intellectual property law and policy The study primarily explores whether conflicts between patents and human rights in the context of access to medicines are inevitable or whether patents can be made to serve human rights What could be a normative framework that human rights might provide for patents and innovation Joo Young Lee argues that it is necessary to have a deepened understanding of each of the two sets of norms that govern this issue that is patent law and international human rights law The chapters investigate the relevant dimensions of patent law and analyse particular human rights bearing upon the issue of intellectual property and access to medicines This study will be of great interest to academic specialists practitioners or professionals in the fields of human rights trade and intellectual property as well as policy makers activists and health professionals across the world working in intellectual property and human rights

Plant Single Cell Type Systems Biology Marc Libault, Sixue Chen, 2016-09-06 The phenotype of a plant in response to a stress condition is the reflection of the molecular responses in different cell types composing the plant The multicellular complexity represents a challenge when accessing specific responses of each cell or cell type composing the plant To overcome this difficulty and allow the clear characterization of the plant cell molecular mechanisms the research community is now focusing on studying a single cell and single cell types The isolation of plant single cells is limited by the cell wall that confers the rigidity of the plant and its overall structure Various methods have been developed for isolating plant cells e g laser capture microdissection cell sorting of Green Fluorescent Protein GFP tagged protoplasts differential protoplastization of cells such as guard cells isolation of easily accessible cell types such as cotton fiber pollen cells trichomes and root hair cells The development of these innovative approaches to isolate single plant cells or cell types combined with the application of sensitive and high throughput

technologies allows a better analysis of the developmental processes and response to environmental stresses Ultimately single plant cell and cell type biology will lead to establishment of more reliable and accurate molecular regulatory networks at the resolution of basic life unit The goal of this Research Topic is to cover new technological and biological advances in the study of plant single cell cell type and systems biology [The SAGE Encyclopedia of Surveillance, Security, and Privacy](#) Bruce A. Arrigo, 2016-06-15 In all levels of social structure from the personal to the political to the economic to the judicial The SAGE Encyclopedia of Surveillance Security and Privacy uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide

**Neural and Computational Modeling of Movement Control** Ning Lan, Vincent C. K. Cheung, Simon C. Gandevia, 2017-04-17 In the study of sensorimotor systems an important research goal has been to understand the way neural networks in the spinal cord and brain interact to control voluntary movement Computational modeling has provided insight into the interaction between centrally generated commands proprioceptive feedback signals and the biomechanical responses of the moving body Research in this field is also driven by the need to improve and optimize rehabilitation after nervous system injury and to devise biomimetic methods of control in robotic devices This research topic is focused on efforts dedicated to identify and model the neuromechanical control of movement Neural networks in the brain and spinal cord are known to generate patterned activity that mediates coordinated activation of multiple muscles in both rhythmic and discrete movements e g locomotion and reaching Commands descending from the higher centres in the CNS modulate the activity of spinal networks which control movement on the basis of sensory feedback of various types including that from proprioceptive afferents The computational models will continue to shed light on the central strategies and mechanisms of sensorimotor control and learning This research topic demonstrated that computational modeling is playing a more and more prominent role in the studies of postural and movement control With increasing ability to gather data from all levels of the neuromechanical sensorimotor systems there is a compelling need for novel creative modeling of new and existing data sets because the more systematic means to extract knowledge and insights about neural computations of sensorimotor systems from these data is through computational modeling While models should be based on experimental data and validated with experimental evidence they should also be flexible to provide a conceptual framework for unifying diverse data sets to generate new insights of neural mechanisms to integrate new data sets into the general framework to validate or refute hypotheses and to suggest new testable hypotheses for future experimental investigation It is thus expected that neural and computational modeling of the sensorimotor system should create new opportunities for experimentalists and modelers to collaborate in a joint endeavor to advance our understanding of the neural mechanisms for postural and movement control The editors would like to thank Professor Arthur Prochazka who helped initially to set up this research topic and all authors who contributed their articles to this research topic Our appreciation also goes to the reviewers who volunteered their time and effort to help achieve the goal of this research topic

We would also like to thank the staff members of editorial office of Frontiers in Computational Neuroscience for their expertise in the process of manuscript handling publishing and in bringing this ebook to the readers The support from the Editor in Chief Dr Misha Tsodyks and Dr Si Wu is crucial for this research topic to come to a successful conclusion We are indebted to Dr Si Li and Ms Ting Xu whose assistant is important for this ebook to become a reality Finally this work is supported in part by grants to Dr Ning Lan from the Ministry of Science and Technology of China 2011CB013304 the Natural Science Foundation of China No 81271684 No 61361160415 No 81630050 and the Interdisciplinary Research Grant cross Engineering and Medicine by Shanghai Jiao Tong University YG20148D09 Dr Vincent Cheung is supported by startup funds from the Faculty of Medicine of The Chinese University of Hong Kong Guest Associate Editors Ning Lan Vincent Cheung and Simon Gandevia

**International Plant Proteomics Organization (INPPO) World Congress 2014** Joshua L. Heazlewood, Jesús V. Jorrín-Novo, Ganesh Kumar Agrawal, Silvia Mazzuca, Sabine Lühthje, 2017-02-08 The field of proteomics has advanced considerably over the past two decades The ability to delve deeper into an organism's proteome identify an array of post translational modifications and profile differentially abundant proteins has greatly expanded the utilization of proteomics Improvements to instrumentation in conjunction with the development of these reproducible workflows have driven the adoption and application of this technology by a wider research community However the full potential of proteomics is far from being fully exploited in plant biology and its translational application needs to be further developed In 2011 a group of plant proteomic researchers established the International Plant Proteomics Organization INPPO to advance the utilization of this technology in plants as well as to create a way for plant proteomics researchers to interact collaborate and exchange ideas The INPPO conducted its inaugural world congress in mid 2014 at the University of Hamburg Germany Plant proteomic researchers from around the world were in attendance and the event marked the maturation of this research community The Research Topic captures the opinions ideas and research discussed at the congress and encapsulates the approaches that were being applied in plant proteomics

*Recent Advances of Epigenetics in Crop Biotechnology* Clelia De-la-Peña, Raúl Alvarez-Venegas, Christopher Cullis, 2016-05-31 Epigenetics is a new field that explains gene expression at the chromatin structure and organization level Three principal epigenetic mechanisms are known and hundreds of combinations among them can develop different phenotypic characteristics DNA methylation histone modifications and small RNAs have been identified and their functions are being studied in order to understand the

mechanisms of interaction and regulation among the different biological processes in plants Although fundamental epigenetic mechanisms in crop plants are beginning to be elucidated the comprehension of the different epigenetic mechanisms by which plant gene regulation and phenotype are modified is a major topic to develop in the near future in order to increase crop productivity Thus the importance of epigenetics in improving crop productivity is undoubtedly growing Current research on epigenetics suggest that DNA methylation histone modifications and small RNAs are involved in almost every aspect of plant life including agronomically important traits such as flowering time fruit development responses to environmental factors defense response and plant growth The aim of this Research Topic is to explore the recent advances concerning the role of epigenetics in crop biotechnology as well as to enhance and promote interactions among high quality researchers from different disciplines such as genetics cell biology pathology microbiology and evolutionary biology in order to join forces and decipher the epigenetic mechanisms in crop productivity

The elephant and the dragon in contemporary life sciences Joy Y. Zhang, Saheli Datta Burton, 2022-03-15 This book provides a powerful diagnosis of why the global governance of science struggles in the face of emerging powers Through unpacking critical events in China and India over the past twenty years it demonstrates that the subversiveness assumed in the two countries rise in the life sciences reflects many of the regulatory challenges that are shared worldwide It points to a decolonial imperative for science governance to be responsive and effective in a cosmopolitan world By highlighting epistemic injustice within contemporary science the book extends theories of decolonisation

*Health Data Pools Under European Data Protection and Competition Law* Giulia Schneider, 2022-04-13 This book explores the emerging economic reality of health data pools from the perspective of European Union policy and law The contractual sharing of health data for research purposes is giving rise to a free movement of research data which is strongly encouraged at European policy level within the Digital Single Market Strategy However it has also a strong impact on data subjects fundamental right to data protection and smaller businesses and research entities ability to carry out research and compete in innovation markets Accordingly the work questions under which conditions health data sharing is lawful under European data protection and competition law For these purposes the work addresses the following sub questions i which is the emerging innovation paradigm in digital health research ii how are health data pools addressed at European policy level iii do European data protection and competition law promote health data driven innovation objectives and how iv which are the limits posed by the two frameworks to the free pooling of health data The underlying assumption of the work is that both branches of European Union law are key regulatory tools for the creation of a common European health data space as envisaged in the Commissions 2020 European strategy for data It thus demonstrates that both European data protection law as defined under the General Data Protection Regulation and European competition law and policy set research enabling regimes regarding health data provided specific normative conditions are met From a further perspective both regulatory frameworks place external limits to the freedom to share or not share

research valuable data     The Value of Everything Mariana Mazzucato,2018-09-11 Modern economies reward activities that extract value rather than create it This must change to ensure a capitalism that works for us all Shortlisted for the FT McKinsey Business Book of the Year Award A scathing indictment of our current global financial system The Value of Everything rigorously scrutinizes the way in which economic value has been accounted and reveals how economic theory has failed to clearly delineate the difference between value creation and value extraction Mariana Mazzucato argues that the increasingly blurry distinction between the two categories has allowed certain actors in the economy to portray themselves as value creators while in reality they are just moving around existing value or even worse destroying it The book uses case studies from Silicon Valley to the financial sector to big pharma to show how the foggy notions of value create confusion between rents and profits reward extractors and creators and distort the measurements of growth and GDP In the process innovation suffers and inequality rises The lesson here is urgent and sobering to rescue our economy from the next inevitable crisis and to foster long term economic growth we will need to rethink capitalism rethink the role of public policy and the importance of the public sector and redefine how we measure value in our society     **High-Performance IT Services** Terry Critchley,2016-10-04 This book on performance fundamentals covers UNIX OpenVMS Linux Windows and MVS Most of the theory and systems design principles can be applied to other operating systems as can some of the benchmarks The book equips professionals with the ability to assess performance characteristics in unfamiliar environments It is suitable for practitioners especially those whose responsibilities include performance management tuning and capacity planning IT managers with a technical outlook also benefit from the book as well as consultants and students in the world of systems for the first time in a professional capacity     **Chemical Engineering in the Pharmaceutical Industry** Mary T. am Ende,David J. am Ende,2019-04-01 A guide to the important chemical engineering concepts for the development of new drugs revised second edition The revised and updated second edition of Chemical Engineering in the Pharmaceutical Industry offers a guide to the experimental and computational methods related to drug product design and development The second edition has been greatly expanded and covers a range of topics related to formulation design and process development of drug products The authors review basic analytics for quantitation of drug product quality attributes such as potency purity content uniformity and dissolution that are addressed with consideration of the applied statistics process analytical technology and process control The 2nd Edition is divided into two separate books 1 Active Pharmaceutical Ingredients API s and 2 Drug Product Design Development and Modeling The contributors explore technology transfer and scale up of batch processes that are exemplified experimentally and computationally Written for engineers working in the field the book examines in silico process modeling tools that streamline experimental screening approaches In addition the authors discuss the emerging field of continuous drug product manufacturing This revised second edition Contains 21 new or revised chapters including chapters on quality by design computational approaches for drug product modeling process
