International Symposium on Fuzzy Systems, Knowledge Discovery and Natural Computation (FSKD 2014) Defu Zhang, Xiamen University, China, 2014-09-02 ICNC FSKD is a premier international forum for scientists and researchers to present the state of the art of data mining and intelligent methods inspired from nature particularly biological linguistic and physical systems with applications to computers circuits systems control communications and more This is an exciting and emerging interdisciplinary area in which a wide range of theory and methodologies are being investigated and developed to tackle complex and challenging problems **Resources in Education**, 1995 **Space and Facilities for Art Instruction** James L. Taylor, 1963 **The Tyranny of Metrics** Jerry Z. Muller, 2019-04-30 Today organizations of all kinds are ruled by the belief that the path to success is quantifying human performance publicizing the results and dividing up the rewards based on the numbers But in our zeal to instill the evaluation process with scientific rigor we've gone from measuring performance to fixating on measuring itself The result is a tyranny of metrics that threatens the quality of our lives and most important institutions In this timely and powerful book Jerry Muller uncovers the damage our obsession with metrics is causing and shows how we can begin to fix the problem Filled with examples from education medicine business and finance government the police and military and philanthropy and foreign aid this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts whether by encouraging gaming the stats or teaching to the test That's because what can and does get measured is not always worth measuring may not be what we really want to know and may draw effort away from the things we care about Along the way we learn why paying for measured performance doesn't work why surgical scorecards may increase deaths and much more But metrics can be good when used as a complement to rather than a replacement for judgment based on personal experience and Muller also gives examples of when metrics have been beneficial Complete with a checklist of when and how to use metrics *The Tyranny of Metrics* is an essential corrective to a rarely questioned trend that increasingly affects us all **Fundamentals of Corporate Finance** Robert Parrino, Thomas W. Bates, Stuart L. Gillan, David S. Kidwell, 2021-12-14 *Fundamentals of Corporate Finance* 5th Edition develops the key concepts

Mineral Commodity Profiles United States. Bureau of Mines,1977 **Adapting Public Policy to a Labour Market in Transition** France St-Hilaire,2000 After two decades of rapid technological and structural change and an overall record of poor economic performance Canadians need to take stock of the ongoing transformation of the labour market and its implications for public policy The fundamental changes to the nature of work itself suggest that labour and social policies established decades ago may no longer be adequate or appropriate Moreover the continuing perception of increased instability and worsening employment outcomes and the growing concern over increased earnings inequality and labour market polarisation have raised serious questions about the role of government not only in addressing the consequences of economic adjustment but also in facilitating or worse hampering this process In Adapting Public Policy to a Labour Market in Transition leading labour market specialists examine specific areas of public policy that have generated considerable attention and debate in recent years They provide new evidence on issues of utmost concern to the well being of Canadians and a solid assessment of the challenges and avenues for policy reform
