

CRITERION A

• Background of personal interest

The personal project is based on giving the students opportunities to explore topics that they enjoy and that spark curiosity in them. Personally, my close connecting to Estepona is what sparks my curiosity to investigate further and create a project based around it. This is the place where I was born and where I grew up. I have watched it grow from the little village that it was when I first knew it into the large city that it is turning into today. Knowing how extraordinary Estepona is, I am baffled as to why so few of my schoolmates live there. I believe SiS offers one of the best educations a child can have and I think it's shame that people miss out on the experience just from being uninformed about options to live other than Sotogrande. I know this is true from personal experience where my friends have complained about the lack of things to do in Sotogrande and the 'bubble' feeling it has.

Moreover, from this project I hope to gain a more in depth understanding about the topic of marketing and how to appeal to different audiences in particular ways, as that is another area that I've always wanted to develop skills and knowledge in. Various close relatives have worked in this field their whole lives and I considered that the personal project was a great opportunity to finally quench my curiosity.

• Definition of Clear Goal and justification of goal as highly challenging

My goal was to research reasons why families choose to live in Estepona, to create marketing content targeted at a wide range of audiences considering moving to the Costa del Sol and to assist the relevant promoters in order to better educate families considering moving to this area. These videos will be translated into the three most spoken languages at the school in order to expand the range of audiences of my product. My product is aimed for newcomers to the area and specifically to the school, who want to be more informed about their surroundings. The aim of my personal project is to make new families coming to the area more aware of their options, therefore making a more informed decision when buying a residence so that they choose the location for the right reasons. This goal is highly challenging because it defines something that is reasonable within the period of time I have to complete it, however that still tests my skills and my way of thinking.

• Global context

My global context is "Identities and Relationships." This global context is all based upon the idea of human nature, and who we are as individuals or as a community with our own different beliefs and values. I created my project around this global context because it was the most appropriate as my project is based on exploring and communicating the identity of the community of Estepona, capturing the identity in a short multimedia message and communicating it to an specific audience. Additionally marketing is concentrated of the investigation of human nature, more specifically the nature that humans have in making one decision or another and therefore "Identities and Relationships" is irrefutably the right choice of global context. If I would have chosen another global context such as, "Orientation in Space and Time", I would have concentrated more on the historical part of Estepona and its evolution to what it is today. The shots I have chosen to include are all based on attracting and appealing to different audiences in terms of marketing it, however these choices of content and format would have changed.

• Prior learning

I have a lot of knowledge from personal experience. I live in Estepona and go to SiS, I have dealt firsthand with situations where newly arrived families to the area who were previously living in big cities such as Barcelona subsequently leave because Sotogrande doesn't offer what they are looking for or what they were used to; when I know from personal experience that Estepona does (Appendix 1C). Furthermore from a young person's
