**Experimental Stress Analysis** H. Wieringa, 2012-12-06 Designing and manufacturing structures of all kinds in an economic and a safe way is not possible without doing experimental stress analysis The modernity of structures with their higher reliability demands as well as today's more stringent safety rules and extreme environmental conditions necessitate the improvement of the measuring technique and the introduction of new ones Although theoretical mathematical analysis is improving enormously an example of which is the finite element model it cannot replace experimental analysis and vice versa Moreover the mathematical analysis needs more and more accurate parameter data which in turn need improved experimental investigations No one can do all those investigations on his own Exchange of knowledge and experience in experimental stress analysis is a necessity a thing acknowledged by every research worker Therefore the objective of the Permanent Committee for Stress Analysis PC SA is to promote the organization of conferences with the purpose disseminating new research and new measuring techniques as well as improvements in existing techniques and furthermore to promote the exchange of experiences of practical applications with techniques this VIIIth International Conference on Experimental Stress Analysis on behalf of the PC SA is one in a series which started in 1959 at Delft NL and was followed by conferences at Paris F Berlin W Cambridge K Udine I Munich FRG and Haifa Isr Such a Conference will be held in Europe every fourth year half way between the IUTAM Congresses **Proceedings of the Society for Experimental Stress**

in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association. The Lloyd's Register Staff Association (LRSA) changed its name to the Lloyd's Register Technical Association (LRTA) in 1973.
