1. What do you notice about the path of light when it passes through the prism?

the light curves downward when it passes through the prism.

2. Move the  $\lambda$  slider to increase and then to decrease the **wavelength** of the beam of light.

- A. How does this affect the color of the light ray?

the smaller the nanometer of light is, the darker the color.

- B. How does this affect the direction of the light ray?
