

RST.3 Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.

Learning Objectives
Students will:

- Determine that a force is needed to cause a change in motion.
- Understand that friction is a force resisting motion.
- See that a moving object will continue at constant speed if no forces are acting upon it.
- Determine that larger forces cause greater changes in motion.
- Understand the relationship between speed, position, and time.
- Observe that a constant force gives rise to a constant change in speed.
- Utilize a bar graph and data table to interpret motion.

Vocabulary
force, friction, position, speed

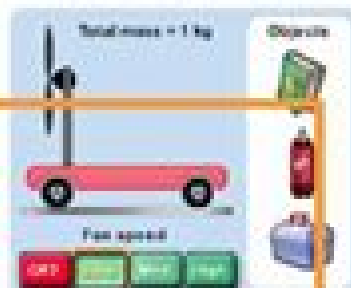

Lesson Overview

The Force and Fan Carts Gizmo™ illustrates basic laws of force and motion. It shows a miniature cart powered only by a fan.

Students can place objects (mass) on the cart, use different surfaces (friction), and change fan speeds (force). The fan can be turned off as the cart rolls to see what results when there is no force on the cart.

The Student Exploration contains three activities.

- Activity A – Students study force and motion, using different fan speeds.
- Activity B – Students explore the effects of friction by selecting different surfaces.
- Activity C – Students investigate the speed and position data to find patterns.

Suggested Lesson Sequence

1. Pre-Gizmo activity (5 – 10 minutes)
A great way to prepare students for this Gizmo is to show them a simple fan cart. If a fan and a skateboard are available, place the fan on the skateboard and turn it on. If not, find a chair on wheels and have a student sit in it, leaning a wall or a heavy desk, and push. Or have a student put roller skates on and throw a heavy object. (Be careful!) Whichever you do, help students notice the two forces working in opposite directions.
2. Prior to using the Gizmo (10 – 15 minutes)
Before students are at the computers, pass out the Student Explorations and ask students to complete the Prior Knowledge Questions. Discuss student answers as a class, but do not provide correct answers yet. Afterwards, if possible, use a projector to introduce the Gizmo and demonstrate its basic operations. In particular, be sure students see that the fan speed can be changed during any experiment.
