Faculty Of Economic And Management:

Calendar University of the Free State. Faculty of Economic and Management Sciences, 2002 *Economics, Management, & Econometrics* Ahmet Mete Çilingirtürk, Anne Albrychiewicz-Słocińska, Besim Bülent Bali, **A Pioneer of Management Research and Education in Japan** Norio Kambayashi, Kyohei Hirano, Izumi Mitsui, 2023-05-23 The purpose of this book is to clarify the mission and history of Kobe University Business School KUBS not only for the development of management education but also for the familiarization of industry in Japan with the ideas of modern management Kobe University was the first in Japan to establish a faculty of business administration and has continued to conduct research and education in the field to this day Under the influence of Germany and the USA the academic area of management in Japan has achieved unique development not witnessed in other countries Since 1902 when its predecessor Kobe Higher Commercial School was established KUBS has been a pioneer of research and education in management studies in Japan by overcoming many obstacles and difficulties Even now in the age of globalization the spirit of innovation and liberal academic style from the time of its establishment are inherent in KUBS and the faculty members have made great efforts to be innovative in management studies This book aims to explore the mission and history of KUBS and to elucidate the development process of Japanese style management research and education by introducing the diverse areas of management studies and the profiles of researchers **Global and Regional Economic Inequality** Stanisław Maciej Kot, Katarzyna Ostasiewicz, 2019-11-11 Global economic inequality has attracted the attention of researchers and policy makers for several years Globalization has raised questions about its impact on global inequality and poverty However the recent answers to such questions are ambiguous According to some researchers global inequality increases Other economists hold that inequality decreases One can also find the opinion that global inequality does not exhibit any visible increasing or decreasing trend One may ask the question what the reason of such variety of opinions about global inequality is The lack of countries statistical income data comparable across countries and years seems to be the main reason of controversial conjectures concerning global inequality and its evolution over time Global samples of individual income data on a worldwide scale would be ideal for this purpose However such micro data are currently available only for a limited number of countries and years In the databases which purport to collect income data on a worldwide scale only some summary statistics quantile income shares means Gini indices are presented However countries Gini indices cannot be used for the evaluation of global inequality since this measure of inequality is not decomposable Therefore the development of efficient methods of extracting micro data from available secondary statistics now seems to be the only way of overcoming the scarcity of national household surveys samples The recent ungrouping methods have several shortcomings among them unknown statistical reliability and the limited coverage of countries are the most serious In this monograph a new method of retrieving the global sample of incomes is proposed This method based on the Sequential Probability Ratio Test generates random samples which

reconstruct unavailable national samples with predetermined statistical reliability and numerical precision The application of this method brings empirical evidences which contradict the widespread opinion about rising global inequality in two recent decades
