Analysis of G/LEO Kinetic Bombardment and Application to National Security Strategies for Full-Spectrum Military Interoperability Ramsey

Elbasheer,2014-05-01 The objective of this study centralized on the analysis of a kinetic bombardment long rod penetrator system and its evident processes ramifications and applications Applications spanned three broad operational intentions deep bunker breach intercontinental strike capability and preeminence over terrestrial forces without matched investment The ambition of a viable Kinetic Bombardment Orbital Mechanism KBOM is for the cost in its entirety from being put into orbit to maintenance and ejecting payloads to be less than or equal to the same amount of marginal effort required to build maintain and launch the required number of ICBMs to complete a given set of tactical objectives Eleven potential Kinetic Bombardment Rod KBR configurations were initially developed varying between two forms standard tungsten carbide rods and tungsten carbide rods equipped with thermobaric warheads Through an Analysis of Alternatives AoA down select process

a final standard tungsten carbide rod composition was selected for use as a case example for further investigation It is concluded that as policies are shaped to allow less restricted military activity in space kinetic bombardment systems will be acquired in response to distinct international events or threats Peer nations seeking to match U S general terrestrial forces without matching U S investment may also look to acquire orbital defense satellites In regards to nations such as the United States that already own weapons effective against all classes of targets kinetic bombardment systems will only become viable prospects once launch costs decline with the development of reusable launch vehicles This study makes the beginning but surely not the whole case for the long pursued concept of orbital defense satellites as the obstacles that once stood in the way recede While it does not however suggest or constitute the immediate development of such a project it perhaps constitutes its future consideration

A Naturalist's Guide to the Great Plains Paul A. Johnsgard, 2018 This book documents nearly 500 US and Canadian locations where wildlife refuges nature preserves and similar properties protect natural sites that lie within the North American Great Plains from Canada's Prairie Provinces to the Texas Mexico border Information on site location size biological diversity and the presence of especially rare or interesting flora and fauna are mentioned as well as driving directions mailing addresses and phone numbers or internet addresses as available US federal sites include 11 national grasslands 13 national parks 16 national monuments and more than 70 national wildlife refuges State properties include nearly 100 state parks and wildlife management areas Also included are about 60 national and provincial parks national wildlife areas and migratory bird sanctuaries in Canada's Prairie Provinces Many public access properties owned by counties towns and private organizations are also described

Wings over the Great Plains: Bird Migrations in the Central Flyway Paul Johnsgard, 2012-11-19 The Central Flyway has been recognized as a collective North South migratory pathway centered on the North American Great Plains for nearly a century but it has never been analyzed as the species that most closely follow it or the major stopping points used by those species on their journeys between their northern breeding and southern wintering grounds A total of 114 U S and 21 Canadian localities of special importance to birds migrating within the Central Flyway are identified and described in detail Judging from available regional state and local information nearly 400 species of 50 avian families regularly use the Central Flyway during their migrations Nearly 90 Central Flyway species have wintering areas partly extending variably far into the Neotropic zoogeographic realm and at least 50 of these winter entirely within the Neotropic realm A few of these species undertake some of the longest known migrations of all birds in excess of 8 000 miles in each direction Seven maps 49 figures and over 100 literature citations are included

Leonardi,2025-04-22 Falcons have been exploited by humans as food source ornamental purposes or for the falconry practices There is a large historical literature in which falcons were often mentioned but always along broader topics mainly ancient falconry and poetry This book is the result of a parallel project developed during the preparation of Behavioral Ecology of Western Palearctic falcons published by Springer in 2020 The main aim is to use archaeological and historical sources on falcons to delineate the past distribution and population ecology of these predators in the Western Palearctic ecozone Ultimately the approach to the data is aimed at defining the population dynamics of falcons over time The relationship conflict with human populations is also placed in this context By putting falcons as a central subject of study this book outlines their path in the Western Palearctic from the Pleistocene to modern ornithology [Backpacker](#) ,2001-10

Leonardi,2020-12-07 This monograph is the result of eight years of bibliographical and field research concerning several behavioural ecology aspects of the Palaeartic falcons For a while this book grew along with The Lanner falcon published in 2015 and revised in 2017 In both books the main aim was to provide a clear overview of the biology and ecology of these species In fact in the last 20 years the number of publications on falcons has grown tremendously and in parallel also those belonging to the so called grey literature The number of people involved is also increased by including both academics and nature lovers Many previously published books emphasized identification and offered little insights on the behavioural and ecological aspects of the species Very often the research on behavioural ecology remains closed within the confines of

academic community By contrast a multitude of basic data is scattered in countless articles published in local magazines Many falcon species are easy to observe and study such as kestrels but others are more rare and localized In order to understand the survival strategies adopted by this group of avian predators it is necessary not to lose sight of the overall picture This book tries to explain the different survival strategies by examining through a few essential chapters some crucial aspects for all species The first chapter provides information on the genus *Falco* its genetics evolution and morphological peculiarities The other chapters deal with reproductive strategies competition exploitation of resources dispersal patterns communication and sociality One of the main objectives of this book is to produce an accessible but scholarly curated source of reference By understanding the most common species it is possible to provide a working framework for rarer and especially threatened falcon species
