Historical Climate Variability and Impacts in North America Lesley-Ann

Dupigny-Giroux,Cary J. Mock,2009-09-18 Climatologists with an eye on the past have any number of sources for their work from personal diaries to weather station reports Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work Missing pieces of a climate puzzle can come from very far afield often in unlikely places In this book a series of case studies examine specific regions across North America using instrumental and documentary data from the 17th to the 19th centuries Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail while the chapters also cover more widespread phenomena such as the collapse of the Low Country rice culture The book also looks at the role of weather station histories in complementing the instrumental record and sets out the methods that involve early instrumental and documentary climate data Finally the book s focus on North America reflects the fact that the historical climate community there has only grown relatively recently Up to now most such studies have focused on Europe and Asia The four sections begin with regional case studies and move on to reconstruct extreme events and parameters This is followed by the role of station history and lastly methodologies and other analyses The editors aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists They designed this book for use by general researchers as well as in upper level undergraduate or graduate level courses

The Politics and Culture of Modern Sports Sheldon Anderson,2015-12-15 This study examines the role of modern sports in constructing national identities and the way leaders have exploited sports to achieve domestic and foreign policy goals The book focuses on the development of national sporting cultures in Great Britain and the United States the particular processes by which the rest of Europe and the world adopted or rejected their games and the impact of sports on domestic politics and foreign affairs Teams competing in international sporting events provide people a shared national experience and a means to differentiate us from them Particular attention is paid to the transnational influences on the construction of

sporting communities and why some areas resisted dominant sporting cultures while others adopted them and changed them to fit their particular political or societal needs A recurrent theme of the book is that as much as they try politicians have been frustrated in their attempts to achieve political ends through sport The book provides a basis for understanding the political economic social and diplomatic contexts in which these games were played and to present issues that spur further discussion and research Ignoring the Apocalypse David Howard Davis, 2007-06-30 Environmentalists often predict an Apocalypse is coming The earth will heat up like a greenhouse We will run out of energy Overpopulation will lead to starvation and war Nuclear winter will kill all plants and animals During the past fifty to one hundred years Americans have heard many prophecies of doom such as the Club of Rome report predicting the world economy would crash about the year 2020 These do not come as complete surprises without any warnings Sometimes the United States simply ignores the threats but other times it makes plans to prevent them This provocative book asks whether American planning is different for dangers that are truly apocalyptic ones that could end life on the planet or at least modern economic prosperity This provocative book begins by asking whether American planning is different for dangers that are truly apocalyptic ones that could end life on the planet or at least modern economic prosperity It goes on to ask why Americans ignore so many problems like the greenhouse effect or an oil shortage or nuclear war problems that have been forecast many times Then when the United States does plan why do those plans often go astray **The Virginias** ,1884 *Iron Age* ,1912
