Upending the Ivory Tower Stefan M. Bradley, 2021-01-19 Winner 2019 Anna Julia Cooper and C L R James Award given by the National Council for Black Studies Finalist 2019 Pauli Murray Book Prize in Black Intellectual History given by the African American Intellectual History Society Winner 2019 Outstanding Book Award given by the History of Education Society The inspiring story of the black students faculty and administrators who forever changed America's leading educational institutions and paved the way for social justice and racial progress The eight elite institutions that comprise the Ivy League sometimes known as the Ancient Eight Harvard Yale Princeton Penn Columbia Brown Dartmouth and Cornell are American stalwarts that have profoundly influenced history and culture by producing the nation's and the world's leaders The few black students who attended Ivy League schools in the decades following WWII not only went on to greatly influence black America and the nation in general but unquestionably awakened these most traditional and selective of American spaces In the twentieth century black youth were in the vanguard of the black freedom movement and educational reform Upending the Ivory Tower illuminates how the Black Power movement which was borne out of an effort to edify the most disfranchised of the black masses also took root in the hallowed halls of America's most esteemed institutions of higher education Between the close of WWII and 1975 the civil rights and Black Power movements transformed the demographics and operation of the Ivy League on and off campus As desegregators and racial pioneers black students staff and faculty used their status in the black intelligentsia to enhance their predominantly white institutions while advancing black freedom Although they were often marginalized because of their race and class the newcomers altered educational policies and inserted blackness into the curricula and culture of the unabashedly exclusive and starkly white schools This book attempts to complete the narrative of higher education history while adding a much needed nuance to the history of the Black Power movement It tells the stories of those students professors staff and administrators who pushed for change at the risk of losing what privilege they had Putting their status and sometimes even their lives in jeopardy black activists negotiated protested and demonstrated to create opportunities for the generations that

followed The enrichments these change agents made endure in the diversity initiatives and activism surrounding issues of race that exist in the modern Ivy League Upending the Ivory Tower not only informs the civil rights and Black Power movements of the postwar era but also provides critical context for the Black Lives Matter movement that is growing in the streets and on campuses throughout the country today As higher education continues to be a catalyst for change there is no one better to inform today s activists than those who transformed our country s past and paved the way for its future

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle

and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go

Climate Change Research at Universities Walter Leal Filho, 2017-06-02 This unique book provides a multidisciplinary review of current climate change research projects at universities around the globe offering perspectives from all of the natural and social sciences Numerous universities worldwide pursue state of the art research on climate change focussing on mitigation of its effects as well as human adaptation to it However the 2015 Paris 21st Conference of the

Parties of the United Nations Framework Convention on Climate Change UNFCCC COP 21 demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision making on climate change To date few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaption studies As a result the published literature has also lacked a broad perspective This book fills that gap and is of interest to all researchers and policy makers concerned with global climate change regardless of their area of expertise

Corrupted Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict **Corrupted** takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
