Nixon's Nuclear Specter William Burr,Jeffrey P. Kimball,2015-06-15 In their initial effort to end the Vietnam War Richard Nixon and Henry Kissinger attempted to lever concessions from Hanoi at the negotiating table with military force and coercive diplomacy They were not seeking military victory which they did not believe was feasible Instead they backed up their diplomacy toward North Vietnam and the Soviet Union with the Madman Theory of threatening excessive force which included the specter of nuclear force They began with verbal threats then bombed North Vietnamese and Viet Cong base areas in Cambodia signaling that there was more to come As the bombing expanded they launched a previously unknown mining ruse against Haiphong stepped up their warnings to Hanoi and Moscow and initiated planning for a massive shock and awe military operation referred to within the White House inner circle as DUCK HOOK Beyond the mining of North Vietnamese ports and selective bombing in and around Hanoi the initial DUCK HOOK concept included proposals for tactical nuclear strikes against logistics targets and U S and South Vietnamese ground incursions into the North In early October 1969 however Nixon aborted planning for the long contemplated operation He had been influenced by Hanoi s defiance in the face of his dire threats and concerned about U S public reaction antiwar protests and internal administration dissent In place of DUCK HOOK Nixon and Kissinger launched a secret global nuclear

alert in hopes that it would lend credibility to their prior warnings and perhaps even persuade Moscow to put pressure on Hanoi It was to be a special reminder of how far President Nixon might go The risky gambit failed to move the Soviets but it marked a turning point in the administration's strategy for exiting Vietnam Nixon and Kissinger became increasingly resigned to a long route policy of providing Saigon with a decent chance of survival for a decent interval after a negotiated settlement and U S forces left Indochina Burr and Kimball draw upon extensive research in participant interviews and declassified documents to unravel this intricate story of the October 1969 nuclear alert They place it in the context of nuclear threat making and coercive diplomacy since 1945 the culture of the Bomb intra governmental dissent domestic political pressures the international nuclear taboo and Vietnamese and Soviet actions and policies It is a history that holds important lessons for the present and future about the risks and uncertainties of nuclear threat making **Finding Reliable**

Information Online Leslie F. Stebbins,2015-09-16 We live in an information saturated environment and spend far too much time searching surfing skimming contributing and organizing the information in our lives We spend too little time immersing ourselves in reliable high quality information We are often so buried in information and strapped for time that we grab information like it was fast food without bothering to evaluate its quality Finding Reliable Information Online Adventures of an Information Sleuth uses stories or information adventures to illustrate the best approaches to searching for information and to help us develop our aptitude for locating high quality resources in a rapidly changing digital environment that is becoming proficient at monopolizing our attention with useless or unreliable information This book is about taking charge of the search process and not handing over the reins to search engines like Google Bing or Yahoo to dictate what information we consume Each chapter focuses on a quest for different types of information while digging deeper into the complexities of finding credible places to look for information and ways to think about evaluating it As the Internet evolves and becomes more sophisticated our strategies for finding and evaluating information need to evolve as well The stories in this book range from investigating challenging research questions to exploring health issues and everyday life questions like finding a reliable restaurant or product review These chapters go beyond the simple and more mechanical checklist approach to evaluating information though these factors are also discussed *Geronimo and Sitting Bull* Bill Markley,2021-05-01 2022

Hatab, 2017-05-05 How is it that sounds from the mouth or marks on a page which by themselves are nothing like things or events in the world can be world disclosive in an automatic manner In this fascinating and important book Lawrence J Hatab presents a new vocabulary for Heidegger's early phenomenology of being in the world and applies it to the question of language He takes language to be a mode of dwelling in which there is an immediate direct disclosure of meanings and sketches an extensive picture of proto phenomenology how it revises the posture of philosophy and how this posture applies to the nature of language Representational theories are not rejected but subordinated to a presentational account of immediate disclosure in concrete embodied life The book critically addresses standard theories of language such that typical

questions in the philosophy of language are revised in a manner that avoids binary separations of language and world speech and cognition theory and practise realism and idealism internalism and externalism
