Artificial Intimacy Rob Brooks, 2021-11-19 What happens when the human brain which evolved over eons collides with twenty first century technology Machines can now push psychological buttons stimulating and sometimes exploiting the ways people make friends gossip with neighbors and grow intimate with lovers Sex robots present the humanoid face of this technological revolution yet although it is easy to gawk at their uncanniness more familiar technologies based in artificial intelligence and virtual reality are insinuating themselves into human interactions Digital lovers virtual friends and algorithmic matchmakers help us manage our feelings in a world of cognitive overload Will these machines fueled by masses of user data and powered by algorithms that learn all the time transform the quality of human life Artificial Intimacy offers an innovative perspective on the possibilities of the present and near future The evolutionary biologist Rob Brooks explores the latest research on intimacy and desire to consider the interaction of new technologies and fundamental human behaviors He details how existing artificial intelligences can already learn and exploit human social needs and are getting better at what they do Brooks combines an understanding of core human traits from evolutionary biology with analysis of how cultural economic and technological contexts shape the ways people express them Beyond the technology he asks what the implications of artificial intimacy will be for how we understand ourselves

Handbook of Dissociation Larry K. Michelson, William J. Ray, 2013-06-29 Within the last decade there has

been a tremendous explosion in the clinical theoretical and empirical literature related to the study of dissociation. Not since the work done at the turn of the century by Pierre Janet, Morton Prince, William James and others have the psychological and medical communities shown this great an interest in describing and understanding dissociative phenomena. This volume is the result of this significant expansion. Presently interest in the scientific and clinical progress in the field of dissociation is indicated by the following:

- 1 The explosion of conferences, workshops and seminars devoted to dissociative disorders treatment and research
- 2 The emergence of NIMH supported investigations that focus on dissociation
- 3 The burgeoning literature on dissociation. According to a 1992 bibliographic analysis of the field by Goettman et al, 1992, 72% of all writings on the topic have appeared in the past decade with about 1000 published papers scattered across diverse disciplines and journals
- 4 Current interest in dissociation as reflected in the appearance of major articles and special issues in respected psychology and psychiatry journals
- 5 The initiation of a journal entitled *Dissociation*. Richard Kluft, MD, Editor, devoted to the area.
