Degenerative Realism Christy Wampole, 2020-06-23 A new strain of realism has emerged in France. The novels that embody it represent diverse fears: immigration and demographic change, radical Islam, feminism, new technologies, globalization, American capitalism, and the European Union. But these books, often best sellers, share crucial affinities. In their dystopian visions, the collapse of France, Europe, and Western civilization is portrayed as all but certain, and the literary mode of realism begins to break down. Above all, they depict a degenerative force whose effects on the nation and on reality itself can be felt. Examining key novels by Michel Houellebecq, Frédéric Beigbeder, Aurélien Bellanger, Yann Moix, and other French writers, Christy Wampole identifies and critiques this emergent tendency toward degenerative realism. She considers the ways these writers draw on social science, the New Journalism of the 1960s, political pamphlets, reportage, and social media to construct an atmosphere of disintegration and decline. Wampole maps how degenerative realist novels explore a world contaminated by conspiracy theories, mysticism, and misinformation, responding to the internet age's confusion between fact and fiction, with a lament for the loss of the real and an unrelenting emphasis on the role of the media in crafting reality. In a time of widespread populist anxieties over the perceived decline of the French nation, this book diagnoses the literary symptoms of today's reactionary revival.

**States of Decadence** Guri Barstad, Karen P. Knutsen, 2016-12-14 *States of Decadence* is a two-volume anthology that focuses on the literary and cultural phenomenon of decadence. Particular attention is given to literature from the end of the 1800s, the fin de siècle; however, the essays presented here are not restricted to this historical period but draw lines both back in time and forward to our day to illuminate the contradictory multiplicity inherent in decadence. Furthermore, the essays go beyond literary studies, drawing on a number of the tropes and themes of decadence manifested in the arts and culture, such as in music, opera, film, history, and even jewelry design.

Cyberhate in the Context of Migrations Angeliki Monnier, Axel Boursier, Annabelle Seoane, 2022-02-11 This edited book takes an interdisciplinary approach to shed light on the complex dynamics involved in the incidence of online hate speech against migrants in user-generated contexts. The authors draw on case studies from Finland, France, Germany, Italy, Poland, and the UK, bringing together qualitative and quantitative analyses of user-generated online comments. The authors argue that online hate speech against migrants must be understood as a symptom of a representation crisis on migration, which can only be fully perceived through the study of the complex linguistic, interactional, and connective processes within which it emerges. They focus on representations and shared meanings, community building, and otherness, and delve into the role of network ecosystems in the process of the construction of public problems. This book will be of interest to undergraduate and postgraduate students as well as academics working on hate speech and migration studies in a variety of fields, and can also contribute to improving research protocols for automated analyses and detections of online hate speech.
