Beghetto,2022-01-24 This book examines the transformation of the figure of the stranger in the literature of the modern age in terms of liminality As a spectral monster that has a paradoxical and liminal relationship to both the sacred and the secular the figure of the modern stranger has played a role in both adapting and shaping a culturally determined understanding of the self and the other With the advent of modernity the stranger the monster and the spectre became interconnected Haunting the edges of reason while also being absorbed into normal society all three together with the cyborg manifest the vulnerability of an age that is fearful of the return of the repressed Yet these figures can also become re appropriated as positive symbols able to navigate between the dangerous and chaotic elements that threaten society while serving as precarious and ironic symbols of hope or sustainability The book shows the explanatory potential of focusing on the resacralizing in a paradoxical and liminal manner of traditionally sacred concepts such as messianic time and the utopian and the conflicts that emerged as a result of secularized modernity s denial of its own hybridization This approach to modern literature shows how the modern stranger a figure that is both paradoxically immersed and removed from society deals with the dangers of failing to be re assimilated into mainstream society and is caught in a fixed or permanent state of liminality a state that can ultimately lead to boredom alienation nihilism and failure These monstrous aspects of liminality can also be rewarding in that traversing difficult and paradoxical avenues they confront both traditional and contemporary viewpoints enabling new and fresh perspectives suspended between imagination and reality past and future nature and artificial In many ways the modern stranger as a figure of literature and the cultural imagination has become more complicated and challenging in the post modern contemporary age both clashing

with and encompassing people who go beyond simply the psychological or even spiritual inability to blend in and out of society. However, while the stranger may be altering once again the defining or essentializing the figure could result in the creation of other sets of binaries and thereby dissolve the purpose and productiveness of both strangeness and liminality. The intention of *Monstrous Liminality* is to trace the liminal sphere located between the secular and sacred that has characterized modernity itself. This space has consequently altered the makeup of the stranger from something external into a figure far more liminal which is forced to traverse this uncanny space in an attempt to find new meanings for an age that is struggling to maintain any.

Cinematographical Introduction to the Theory of Archaeology Aleksander Dzbyński, 2020-02-03

What is archaeology? A research field dealing with monuments. A science. A branch of philosophy. Dzbyński suggests the simple but thoughtful equation: Archaeology = History + Knowledge. This book consists of 8 chapters presenting a collection of characteristic philosophical attitudes important for archaeology. It discusses the historicity of archaeological sources, the source of the algorithmic approach in archaeological reasoning and the accuracy of logical and irrational thinking. In general, this book is concerned with the history of archaeologists' search for a suitable methodology. All these issues are discussed in relation to two main intellectual trends of archaeology to the present day: processual and post-processual archaeology. Processualism introduced and developed the idea of algorithmic and universal reasoning in archaeology, while post-processualism focused attention on the individual value of a monument and the archaeologist himself. These are still two foundations on which the present knowledge of the past is based, and thus their defining role cannot be overestimated. An additional layer of narrative visible right from the beginning of the book is the gradual discovery of the relationship between archaeology and popular culture, especially film and literature. Its aim is both illustration and explanation. It is intended that the reader receives not only information and knowledge but also a deeper emotional reference which is connected with the reception of works of art.

In Frankenstein's Wake Alison Bedford, 2021-01-11

Just over 200 years ago, on a stormy night, a young woman conceived of what would become one of the most iconic images of science gone wrong: the story of Victor Frankenstein and his Creature. For a long period, Mary Shelley languished in the shadow of her luminary husband, Percy Bysshe Shelley, but was rescued from obscurity by the feminist scholars of the 1970s and 1980s. This book offers a new perspective on Shelley and on science fiction, arguing that she both

established a new discursive space for moral thinking and laid the groundwork for the genre of science fiction Adopting a contextual biographical approach and undertaking a close reading of the 1818 and 1831 editions of the text give readers insight into how this story synthesizes many of the concerns about new science prevalent in Shelley's time Using Michel Foucault's concept of discourse the present work argues that Shelley should be not only credited with the foundation of a genre but recognized as a figure who created a new cultural space for readers to explore their fears and negotiate the moral landscape of new science

Forgotten Marlene Goldman, 2017-11-07 Since the 1860s long before scientists put a name to Alzheimer's disease Canadian authors have been writing about age related dementia Originally most of these stories were elegies designed to offer readers consolation Over time they evolved into narratives of gothic horror in which the illness is presented not as a normal consequence of aging but as an apocalyptic transformation Weaving together scientific cultural and aesthetic depictions of dementia and Alzheimer's disease Forgotten asserts that the only crisis associated with Canada's aging population is one of misunderstanding Revealing that turning illness into something monstrous can have dangerous

consequences Marlene Goldman seeks to identify the political and social influences that have led to the gothic disease model and its effects on society Examining the works of authors such as Alice Munro Michael Ignatieff Jane Rule and Caroline Adderson alongside news stories and medical and historical discussions of Alzheimer's disease Goldman provides an alternative person centred perspective to the experiences of aging and age related dementia Deconstructing the myths that have transformed cognitive decline into a corrosive fantasy Forgotten establishes the pivotal role that fictional and non-fictional narratives play in cultural interpretations of disease
