

Chrysler Puts Boating Safety First

Every Chrysler boat is B.I.A. certified for your safety. All boat builders must construct hulls to meet minimum state and federal safety requirements. But Chrysler does much more. Your new boat is built to comply fully with the additional, voluntary safety standards recommended by the Boating Industry Association, a national organization serving all elements of the boating industry. With your new Chrysler boat you can be sure the ratings are right when it comes to load capacity, horsepower, flotation, backfire flame control, steering and fuel systems, navigation lights and ventilation.

Note particularly the B.I.A. recommended load capacity for your boat. This rating has been formulated for your safety. Don't exceed it. Ignoring it may nullify your warranty. "Load capacity" includes the weight of everything and everyone you put into the boat, including motor, fuel and gear.

FLOTATION: Your Chrysler boat has the finest flotation available and complies with all B.I.A. requirements. No boat is unsinkable. Therefore, life preservers should be carried for each passenger as required by law (see page 6).

DRAINS AND BAILERS: Most Chrysler boats have self-bailers located in or near the transom, positioned to bail water out while you are under way at speeds of 10 mph or more, or to drain the cockpit when washing down boat on a trailer. Be sure to replace plug as soon as bailing is completed, or when speed is reduced. Check to see that the plug is tightly in place before launching.
