How To Commit The Perfect Murder Forensic Science Analyzed:

How to Commit the Perfect Murder David Elio Malocco, 2015-02-18 Today most murder crimes can be detected through DNA analysis and the assistance of forensic scientists like pathologists toxicologists and ballistic experts So the question must be asked can a criminal using the knowledge of forensic science to their own advantage reduce their percentage of detection in order to commit the perfect murder If a criminal knew exactly what investigators were looking for at a crime scene could they use that to avoid detection Crime Scene Analysis is a documented and forensic process Fortunately most murderers do not approach their crimes in a scientific manner But if you thought like a forensic scientist is it possible to commit the perfect murder The idea of committing the perfect murder by which I mean committing a murder and not being apprehended is the ultimate intellectual challenge A select few have endeavoured to put theory into practice Some have succeeded A few experts will reluctantly admit that there might be a way to get away with murder They say it would require an undetectable weapon a perfect location to commit the crime and an ingenious way to dispose of the body There are many pitfalls a criminal can avoid by studying forensic science just as there are many ways a poisoner can evade capture by studying toxicology For example did you know that the greatest source of evidence in a murder case is extracted from the victim's body Forensic science will use an autopsy to determine the time of death the victim's last meal the manner of death the weapon used maybe even the actual weapon itself Marks on the body will assist the pathologist in this regard All of this information pieced together will bring them closer to catching the culprit But there are ways to avoid this There are ways of killing a person without leaving any marks on the body There are ways to avoid leaving your DNA at the crime scene There are ways to dispose of the body so that it will never be recovered at least not in your lifetime Even as you read this book someone somewhere is committing the perfect murder They will never be caught and forensic science although it has greatly enhanced detection rates is not yet fool proof Despite what you may have read elsewhere that the perfect murder exists only in Crime Fiction novels the fact is that thousands of perfect murders are committed every year Dr Harold Shipman is the world's most prolific serial killer who killed over one thousand of his patients before making some basic mistakes which resulted in his capture It was only when his motive became one of greed that he was caught Up to that point he had committed a thousand perfect murders So yes it is possible to commit the perfect murder How Well let's say it's complicated
