

# What Is Each Gear Used For?

## 1st GEAR

For driving away from a complete stop

For parking the car on a hill with the parking brake

## 3rd GEAR

For shifting up at 20 mph

## 5th GEAR

For shifting up at 40 mph depending on how many gears your car has

## NEUTRAL

For parking the car on a flat space with the parking brake

For idling or stopping while the clutch is not depressed

## 2nd GEAR

For shifting up at 10 mph

Commonly used for driving away from a full stop

## 4th GEAR

For shifting up at 30 mph

## REVERSE

For moving the car backwards

Knowing when to shift depends on the car and the gearing system you have. Always read your owner's manual if you are unfamiliar with how your manual transmission works.

Goldberg, 2010-03-11 Whereas science, technology and medicine have all called forth dedicated philosophical investigations, a fourth major contributor to the technoscientific world in which we all live, that is engineering, has been accorded almost none of the philosophical attention it deserves. This volume thus offers a first characterisation of this important new field by some of the primary philosophers and ethicists interested in engineering and leading engineers interested in philosophical reflections. The volume deals with such questions as: What is engineering? In what respect does engineering differ from science? What

ethical problems does engineering raise By what ethical principles are engineers guided How do engineers themselves conceive of their profession What do they see as the main philosophical challenges confronting them in the 21st century The authors respond to these and other questions from philosophical and engineering view points and so illustrate how together they can meet the challenges and realize the opportunities present in the necessary encounters between philosophy and engineering encounters that are ever more important in an increasingly engineered world and its problematic futures
