

Econometrics 2A Practical 8

One-sample hypothesis testing

1. The manager of a department store wishes to establish a new billing system for the store's credit customers. After a thorough financial analysis, she determines that the new system will not be cost-effective if the average monthly account balance is less than \$70.00. A random sample of 200 monthly accounts is drawn, for which the mean monthly account balance is \$ 66.00. Using a 5% level of significance is there sufficient evidence to conclude that the new system will not be cost-effective? Assume that the population standard deviation is \$30.00.

Step 1: State the null hypothesis and the alternate hypothesis

$H_0: \mu \geq 70$

$H_1: \mu < 70$

Step 2: Select a level of significance.

$\alpha = 0.05$

Step 3: Select the test statistic.

Since the sample size is large and the population standard deviation is known, we will use the z-test.

Step 4: Formulate the decision rule.

For a one-tail test, we will compare the computed z-value from the sample data and the critical value of z from the standard normal distribution.

The critical z value = $\text{NORMSINV}(0.05) = -1.644854$

If the computed z-value is less than the critical value, we will reject the null hypothesis.

Step 5: Make a decision.

$$z\text{-value} = \frac{\bar{x} - \mu}{\sigma / \sqrt{n}} = \frac{66 - 70}{30 / \sqrt{200}} = -1.8856$$

Since $-1.885618 < -1.644854$, we reject the null hypothesis at 5% level of significance.

Step 6: Interpret the results

Therefore, there is sufficient evidence to conclude that the new billing system will not be cost-effective.

2. An insurance company pays its agents by commission. The compensation plan assumes a mean commission payment of R 32 000 per year. If the mean payment differs from the plan amount, a change in the plan may be required. For a sample of 26 agents, the mean commission payment for the past year was R 27 500 and the standard deviation was R 8 400. If the mean payment for the entire sales force is as different as indicated by this sample, then management plans to change the compensation plan. Using a 1% significance level, does this sample evidence clearly indicate that the mean has changed?

Step 1: State the null hypothesis and the alternate hypothesis

Hypothesis Testing Practical For Grade 12 Memo

Michael Hoelscher

Hypothesis Testing Practical For Grade 12 Memo:

Thank you completely much for downloading **Hypothesis Testing Practical For Grade 12 Memo**. Most likely you have knowledge that, people have seen numerous periods for their favorite books following this Hypothesis Testing Practical For Grade 12 Memo, but end taking place in harmful downloads.

Rather than enjoying a good eBook gone a cup of coffee in the afternoon, on the other hand they juggled as soon as some harmful virus inside their computer. **Hypothesis Testing Practical For Grade 12 Memo** is welcoming in our digital library an online admission to it is set as public for that reason you can download it instantly. Our digital library saves in combination countries, allowing you to get the most less latency times to download any of our books later this one. Merely said, the Hypothesis Testing Practical For Grade 12 Memo is universally compatible similar to any devices to read.
