of over 200 schools and colleges For any parent guardian or carer who is considering the independent sector the Guide is the definitive reference source [Global University Rankings](#) T. Erkkilä,2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe **The Independent**,1917 **The Times Good University Guide 2007** John O'Leary,2006 YEARBOOKS ANNUALS ALMANACS How do you find the best university for the subject you wish to study You need a guide that evaluates the quality of what is available giving facts figures and comparative assessments of universities Since 1992 The Times has produced the most widely respected and used university league tables The Guide takes the key measures of quality as its focus so you can make informed choices of university and subjects Still unique and still controversial the rankings provide hard data analysed interpreted and presented by a team of experts The 2009 edition of the best selling Good University Guide has been further extended Two pages of information on each university Detailed coverage of Oxford and Cambridge colleges Information specifically designed for international students [The Independent](#) William Livingston,1917 [Australian national bibliography](#) ,1961 *Quality in Higher Education* David Andrew Turner,2012-01-01 The quality of higher education is a hot topic especially as students around the world are asked to pay more towards their own education and expect to get what they pay for In addition league tables both national and international have come to dominate discussion with several governments and many institutions setting themselves the goal of improving their ratings In this volume Professor Turner examines the assumptions that are being made about what counts as quality and what the traditional purposes of universities are But with the growth of mass higher education and the rise of student centred approaches to learning and teaching it has become increasingly clear that high quality education is education that meets the needs of the student at that particular moment and promotes their future development After examining a range of different approaches to the quality of higher education and its measurement Professor Turner develops an approach to benchmarking and quality enhancement that is better suited to the ethos of individualised learning and uses it to critique the philosophies that have dominated debates about quality to date This book will be of interest to scholars of higher education but also has something important to add to debates that engage policy makers in higher education It provides a background to the historical development of universities which might help
