A product that contains a chemical with established biological effects is referred to as a pharmaceutical or medical product. The term active compound refers to a substance that is normally a drug or pro drug which is an inactive medication or compound that becomes an active drug upon ingestion. However, it can also have a cellular component or contain other elements such as preservatives, containment material that can shield users or the environment from high toxicity etc. The medication enters the body through one of three routes: 1 ingestion and absorption in the digestive tract, 2 passive transfer through tissues that are porous such as the skin, lungs, alveoli and mucous membranes, or 3 direct insertion into the interior tissues through intramuscular, intrathecal, subcutaneous or intrathecal injection or intravenous, intraosseous infusion. A drug used for diagnosing, curing, treating or relieving a
