

Recommended Testing Times and Information on Test Sessions

MCAS test sessions will remain untimed in spring 2019. The recommended times for scheduling test sessions are based on an analysis of student testing time from the MCAS next-generation computer-based testing in 2018. The Department will continue to review testing time used by students during computer-based testing and may make additional adjustments in the future.

For all of the tests except the high school STE and the Biology and Introductory Physics field tests, schools should plan for one short, supervised break per session (3–5 minutes) to be given at each test administrator's discretion. Also, schools may consider providing designated accessibility features (DFs), which are available to all students, such as DF3 ("Frequent brief supervised breaks"), particularly for younger students.

It is important for all testing to occur during regular school days and to begin at the start of the regular school day, to ensure equivalent testing conditions in schools across the state and to ensure that all students, including students with disabilities and EL students, are afforded an equal opportunity to benefit from untimed tests.
